When first invited to give talks and demonstrations on carving techniques to school children, Howard K. Suzuki quickly found out that wood was not the most suitable medium. It took too long to show much progress in the limited time available. He decided to use bars of soap to demonstrate basic techniques on carving and sculpturing. Soap is an inexpensive and very desirable carving

medium. Soon demonstrations developed into hands-on experiences for his students. In this book, Dr. Suzuki describes and illustrates with color photographs how to make safe and simple wooden carving tools. He demonstrates basic soap-carving techniques using several stepwise how-to examples, from a simple heart to a more complex turtle. Dr. Suzuki integrates art and science into his instructions and combines them to produce a super learning experience for children (of all ages) who do learn to carve through his methods.

Teach Yourself VISUALLY Access 2010 Southwater Pub Throughout World War II, when Saturday nights came around, servicemen and hostesses happily forgot the war for a little while as they danced together in USO clubs, which served as havens of stability in a time of social, moral, and geographic upheaval. Meghan Winchell demonstrates that in addition to boosting soldier morale, the USO acted as an architect of the gender roles and sexual codes that shaped the "greatest generation." Combining archival research with extensive firsthand accounts from among the hundreds of thousands of female USO volunteers, Winchell shows how the organization both reflected and shaped 1940s American society at large. The USO had hoped that respectable feminine companionship would limit venereal disease rates in the military. To that end, Winchell explains, USO recruitment practices characterized white middle-class women as sexually respectable, thus implying that the sexual behavior of working-class women and women of color was suspicious. In response, women of color sought to redefine the USO's definition of beauty and respectability, challenging the USO's vision of a home front that was free of racial, gender, and sexual conflict. Despite clashes over class and racial ideologies of sex and respectability, Winchell finds that most hostesses

benefited from the USO's chaste image. In exploring the USO's treatment of female volunteers, Winchell not only brings the hostesses' stories to light but also supplies a crucial missing piece for understanding the complex ways in which the war both destabilized and restored certain versions of social order.

In other words, they must think like owners. Problem is, few employees know how. Your job as a leader is to train them to think this way. Because entrepreneurial thinking is a natural extension of company culture, you may need to re-build yours from the ground up. Michael Houlihan and Bonnie Harvey New York Times bestselling authors and founders of Barefoot, America's #1 wine brand know how to create the conditions that draw out and nourish people's inner entrepreneurs. Here, they take the principles that empowered their own tribe of productive, creative, loyal employees to beat the odds and boil those principles down into quick, easy lessons you can put into practice right away. You'll discover: How to find and hire people with entrepreneurial DNA (P. 5) How to drive results with performance-based compensation (P. 13) How to foster innovation by getting out of your people's way (P. 17) How to remove roadblocks to the entrepreneurial spirit (P. 33) Why everyone at your company must ask questions (including you) (P. 35) Why your people should embrace mistakes (P. 39) The Entrepreneurial Culture perfectly complements the lessons from the authors New York Times bestseller "The Barefoot Spirit: How Hardship, Hustle, and Heart Built America's #1 Wine Brand." Together, these books will give your company the edge it needs to thrive and boost the bottom line. Michael Houlihan and Bonnie Harvey started the Barefoot Wine brand in their laundry room in 1986, made it a nationwide bestseller, and successfully sold the brand to E&J Gallo in 2005. Starting with virtually no money and no wine industry experience, they employed innovative ideas to overcome obstacles and create new markets. Today, they are sought-after

entrepreneurial thought leaders, consultants, keynote speakers, and workplace culture experts with hundreds of articles in national and professional publications. In May 2019, the Institut für Arbeitsschutz der Deutschen Gesetzlichen Unfallversicherung (IFA) was hosting the 14th International Conference on Hand-Arm-Vibration. The event is organised every four years under the auspices of international expert bodies at changing places. It is aimed at all stakeholders in the subject, whether experts from the occupational safety and health and research communities or management personnel in the areas of manufacture and design. Mechanized manual work is often associated with exposure to vibration that may impact adversely upon the health and well-being of the affected individuals. Besides impairments to comfort and performance, harm to the hand-arm system, possibly permanent, must be prevented as a matter of priority. In a world of work that is becoming more and more complex, combined exposures are also becoming increasingly relevant. What influence does hand-arm vibration have in conjunction with noise or whole-body vibration? What contribution can be made by medicine, diagnostics, epidemiology, measurement technology and prevention to the identification and containment of risks, and better still, to their elimination? What is the role of international regulatory activity in this context? The 14th International Conference on Hand-Arm Vibration aimed to address these and many other questions concerning hand-arm vibration, and to find answers relevant to the field.
