Welcome to the Green Book a comprehensive guide for financial institutions that receive ACH payments from the Federal government. Today, the vast majority of Federal payments are made via the ACH. With very few exceptions, Federal government ACH transactions continue to be subject to the same rules as private industry ACH payments. As a result, the Green Book continues to get smaller in size and is designed to deal primarily with exceptions or issues unique to Federal government operations.

In 2016, the Office of the Under Secretary of Defense (Comptroller) (OUSD[C]) asked the military departments to minimize reimbursable civilian personnel costs to increase the transparency of accounting practices and improve auditability. The OUSD(C) guidance focuses on minimizing reimbursables because they make transactions between organizations less transparent and harder to trace. Along with financial and accounting considerations, the authors' assessment considered how the current reimbursement models and several alternative funding models at two Army commands- the U.S. Army Research, Development, and Engineering Command (RDECOM, renamed the Combat Capabilities Development Command [CCDC] in February 2019) and the U.S. Army Test and Evaluation Command (ATEC)-impact those commands, their customers, and the Army. The authors have the following recommendations: that RDECOM and ATEC continue to operate within their current reimbursement models and that the commands pursue improvements to their current funding models that would allow them to address stakeholder financial and accounting concerns without the drawbacks and risks of alternative funding models. This report should be of most interest to organizations in the Department of Defense that have been asked to minimize reimbursable civilian personnel costs. In

addition, the report will be of general interest to government organizations seeking a better understanding of internal transfer pricing, including examples of how transfer pricing is used and the strengths and weaknesses of different mechanisms.

This Center for Army Lessons Learned (CALL) handbook assists company-, battalion-, and brigade-level officers and noncommissioned officers to effectively use money as a weapons system on the counterinsurgency (COIN) battlefield. Coalition money is defeating COIN targets without creating collateral damage, by motivating antigovernment forces to cease lethal and nonlethal operations, by creating and providing jobs along with other forms of financial assistance to the indigenous population, and by restoring or creating vital infrastructure. Money also funds other tools of war. This handbook is a guide and addresses some of the most common funds available to warfighters. Key lessons: - Money is a valuable weapons system. - Money and contracting in a COIN environment are vital elements of combat power. - Leaders must leverage money and contracting in operations. - Leaders must understand funding programs and contracting. - Brigades often lack internal resource management expertise and knowledge of funding. - Financial management administrative requirements in a combat environment can be extremely burdensome but are necessary for good stewardship. - Financial management expertise and

knowledge of funding are critical to successful operations. - Without proactive leadership involvement, the potential for extensive fraud, waste, and abuse of funds exists in the COIN environment.
