Office has assembled an "encyclopedia" of cases of ethical failure for use as a training tool. These are real examples of Federal employees who have intentionally or unwittingly violated standards of conduct. Some cases are humorous, some sad, and all are real. Some will anger you as a Federal employee and some will anger you as an American taxpayer. Note the multiple jail and probation sentences, fines, employment terminations and other sanctions that were taken as a result of these ethical failures. Violations of many ethical standards involve criminal statutes. This updated (end of 2009) edition is organized by type of violations, including conflicts of interest, misuse of Government equipment, violations of post-employment restrictions, and travel.

TRADOC Pamphlet TP 600-4 The Soldier's Blue Book Civilian Personnel Management This Center for Army Lessons Learned (CALL) handbook assists company-, battalion-, and brigade-level officers and noncommissioned officers to effectively use money as a weapons system on the counterinsurgency (COIN) battlefield. Coalition money is defeating COIN targets without creating collateral damage, by motivating antigovernment forces to cease lethal and nonlethal operations, by creating and providing jobs along with other forms of financial assistance to the indigenous population, and by restoring or creating vital infrastructure. Money also funds other tools of war. This handbook is a guide and addresses some of the most common funds available to warfighters. Key lessons: - Money is a valuable weapons system. - Money and contracting in a COIN environment are vital elements of combat power. - Leaders must

leverage money and contracting in operations. - Leaders must understand funding programs and contracting. - Brigades often lack internal resource management expertise and knowledge of funding. - Financial management administrative requirements in a combat environment can be extremely burdensome but are necessary for good stewardship. - Financial management expertise and knowledge of funding are critical to successful operations. - Without proactive leadership involvement, the potential for extensive fraud, waste, and abuse of funds exists in the COIN environment. In 2016, the Office of the Under Secretary of Defense (Comptroller) (OUSD[C]) asked the military departments to minimize reimbursable civilian personnel costs to increase the transparency of accounting practices and improve auditability. The OUSD(C) guidance focuses on minimizing reimbursables because they make transactions between organizations less transparent and harder to trace. Along with financial and accounting considerations, the authors' assessment considered how the current reimbursement models and several alternative funding models at two Army commands-the U.S. Army Research, Development, and Engineering Command (RDECOM, renamed the Combat Capabilities Development Command [CCDC] in February 2019) and the U.S. Army Test and Evaluation Command (ATEC)-impact those commands, their customers, and the Army. The authors have the following recommendations: that RDECOM and ATEC continue to operate within their current reimbursement models and that the commands pursue improvements to their current funding models that would allow them to address stakeholder financial and accounting concerns without the drawbacks and risks of alternative funding models. This report should be of most interest to organizations in the Department of Defense that have been asked to minimize reimbursable civilian personnel costs. In addition, the report will be of general interest to government organizations seeking a better understanding of internal transfer pricing, including examples of how transfer pricing is used and the strengths and weaknesses of different mechanisms.
