I have tried to include some of the science of ponds while keeping

the information easy to understand. Each chapter begins with an outline of the main points of the topic. Each point is then expanded on. My experience with ponds has mainly been in the warm temperate climate in Perth, Western Australia. The principles for fish ponds are similar worldwide but warm temperate climates like that of Perth intensify some of the problems in ponds. This book will therefore be particularly useful to pond owners in sunny climates. The book begins with pond design, starting with the position of the pond in the garden. I discuss the consequences of different pond sizes and depths, and of natural and artificial ponds. I talk about the advantages of a dual pond system. I give guidelines for these and for self-cleaning ponds. I also say why I recommend designing the pond with a sump, overflow, leaf skimmer, and automatic top-up valve. Lastly, I give my colour preference for the pond bottom and sides. Next, I advise on pond construction. Ponds can be built with concrete, bricks, rigid polyethylene, fibreglass or liners. I write about my experiences with ponds made from each of these materials and also my preferences for pipework materials. In the following chapter, I recommend various pumps, filters (including ultraviolet clarifiers), water features, underwater lights and copper ionizers. Choosing the right equipment will give you the right effect for the lowest cost and for the least effort. The chapter on fish gives information on types of fish, especially goldfish and koi. I advise on when a new pond is ready for fish and on the number of fish a pond can support. I give information on the handling, transporting, and feeding of fish, and on diseases and predators. The next chapter delivers general information on water plants,

---

why you should have them and their role in the ecology of the pond. Plants provide shade, oxygen, food, habitat and cover from predators. They filter toxins and excessive nutrients from the water. I give advice on keeping plants, including information on fertilizer and pests. Finally, I give recommendations for pond maintenance including a routine. My advice is directed at pumps, filters, pond cleanliness, exchanging water and maintaining the pH and hardness. The maintenance is largely directed at algae control. I discuss the various forms of nuisance algae and control methods for microalgae, blanket weed, and slime algae. Other advice includes information on water testing and water treatments. Maintaining good water quality is fundamental to the success of any fish pond. "Good" water quality means the water's suitability for its proposed purpose. Water quality is affected by every aspect of a pond, from its design and construction to its pumps, filters and maintenance. Each chapter of this book tells how each aspect of the pond affects the water. Every fish pond is different. The solutions to one pond's problems may be very different to another pond's.

The Story: Every day in the United States an estimated 550 people die from preventable medical errors, which is approximately 200,000 people a year, making it the 3rd leading cause of death in the United States. (Healthgrades 2004) On April

14, my mom, Louise Batz, went to have knee replacement surgery. That night, a medical error caused Mom to sustain an injury from which she could not recover. She lost her life eleven days later. The Mission: The mission of the Louise H. Batz Patient Safety Foundation is to help prevent medical errors by ensuring that patients and families have the knowledge they need to promote a safe hospital experience for their loved ones and to support innovative advancements in patient safety. Our greatest hope is that families, patients, and caregivers will work together as a TEAM to improve safety in our hospitals. The Use of the Guide: Our hope is that you and your family can use this guide in order to improve the quality of your loved one's hospital stay. We hope that by using the guide, you will be better equipped to aid the care team in the reduction of adverse events. Organize your questions and concerns as soon as you learn about an upcoming surgery or procedure. This packet will be useful during pre-surgery appointments, during your time in the hospital, at home post-surgery and for follow up visits and appointments. We encourage you to include personal questions based on feelings or concerns and utilize the questions provided in the Batz Guide for Bedside Advocacy. What's in the Guide: In this guide you will find all sorts of tools that will help you in all aspects of your hospital stay. You will find places to store personal information such as medication logs, the names of your medical team, and surgery summaries; you will find information on who to contact in case of emergency, charts of who is in charge, and who to call to get things done; and you will find advice, definitions, must ask questions, and places to keep and store all of those little details that can and will help keep you or your loved one more safe.
