Chilton's Guide to Emission Diagnosis, Tune-up and Vacuum Diagrams, 1984-87 [i.e. 86] Domestic Cars Bentley Publishers

The air-cooled four-cylinder VW engine has inhabited iconic cars, such as the Beetle and the Bus, and many other popular Volkswagen vehicles over the years. In stock form, these rather simple engines only produce 29 to 80 hp. Barely adequate for a street car, this level of horsepower falls woefully short for high-performance applications. Fortunately, these engines can be easily modified to produce 300 to 400 hp for the street and much more for extreme high-performance and racing applications. In *VW Air-Cooled Engines: How to Increase Power and Performance*, author Dan Burrill explains how to upgrade and modify these spritely 1,100- to 2,300-cc engines into powerful high-performance engines. Modifying these engines to produce 500 to 600 or more horsepower was once thought inconceivable. Now it is within your reach with the information to build such engines contained in this book. The author explains the installation of a wet or dry sump engine so high horsepower can be attained. Selecting the best high performance parts with the best design is covered in detail. To handle high-RPM and high-performance service, the pushrods, rocker arms, and valvesprings must be upgraded and all the relevant options are discussed. Assembling and installing a long-stroke engine package for superior performance is also examined. In addition, a special section on supercharging, turbo charging, and nitrous is also included. VW Beetles and Buses have never been more popular. Whether you're an enthusiast looking to build a mildly modified engine for improved performance or a competitive racer building an engine to win races, this book is a welcome addition to your shop and performance library.

Volkswagen Corrado (A2) Repair Manual: 1990-1994 Penguin

Bentley Publishers is the exclusive factory-authorized publisher of Volkswagen Service Manuals in the United States and Canada. In every manual we provide full factory repair procedures, specifications, tolerances, electrical wiring diagrams, and lubrication and maintenance information. " At any price, Herr Dr. Porsche. At any price below 1000 marks (\$250)," laughed Hitler as he ordered the inauguration of the Volkswagen project in the late summer of 1933. The scene was Berlin's Hotel Kaiserhof where Hitler, meeting with Germany's most famous automotive engineer, Dr. Ferdinand Porsche, was outlining plans for a "people's car." Hitler wanted, for the German worker, a car that would travel the autobahns, at reasonably high speed, provide gasoline mileage in the 30 to 35 miles per gallon class and be simply constructed and inexpensive to repair. Also, it had to cost less than any other car on the European market.

Volkswagen New Beetle Service Manual 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009 2010 Bentley Publishers
