Katelyn Wolfram was a MI6 agent with a promising career carving up Nazis until one little "Oops" had the King of England place a shoot-on-sight order on her pretty red head and sent her underground. A few years later, with the Third Reich overrunning the free world, Kat ends up trapped hundreds of hellish North African desert miles behind enemy lines with a motley group of misfits. As they work their way back to friendly lines, they team with "The Long Range Desert Group." Together, they begin a terror campaign against the Germans, shattering Rommel's supply lines, scalping Nazis and driving the Gestapo and SS crazy. Ultimately, Kat gets a chance to redeem herself when she stumbles upon Hitler's plan to use the most powerful Wunderwaffe in the history of warfare. But she has a small problem... How can a disgraced and wanted ex MI6 assassin convince the British Command that Hitler is about to win the war...

Written in large text, illustrated in full color, and supported by YouTube videos, it covers car safety, car systems, and car service Here are a few examples of recommended minimum safety practices * let someone know whenever you plan to work under a vehicle * wear Safety glasses, * always using wheel chocks * and always use jack stands whenever you raise a vehicle We also explain how the primary systems in a car work, such as: * the ignition system * the cooling system and * the fuel system There are step-by-step demonstrations that show you how to perform many service procedures, including: * how to change your oil * how to perform a tune-up * how to do a brake job * and many more [Bittersweet Lies](#) Motorbooks International

The Just-in-time (JIT) manufacturing system is an internal system in use by its founder, Toyota Motor Corporation, but it has taken on a new look. Toyota Production System, Second Edition systematically describes the changes that have occurred to the most efficient production system in use today. Since the publication of the first edition of this book in 1983, Toyota has integrated JIT with computer integrated manufacturing technology and a strategic information system. The JIT goal of producing the necessary items in the necessary quantity at the necessary time is an internal driver of production and operations management. The addition of computer integrated technology (including expert systems by artificial intelligence) and information systems technology serve to further reduce costs, increase quality, and improve lead time. The new Toyota production system considers how to adapt production schedules to the demand changes in the marketplace while satisfying the goals of low cost, high quality, and timely delivery. The first edition of this book, Toyota Production System, published in 1983, is the basis for this book. It was translated into many languages including Spanish, Russian, Italian, Japanese, etc., and has played a definite role in inspiring production management systems throughout the world.

This book is a collection of ISRM suggested methods for testing or measuring properties of rocks and rock masses both in the laboratory and in situ, as well as for monitoring the performance of rock engineering structures. The first collection (Yellow Book) has been published in 1981. In order to provide access to all the Suggested Methods in one volume, the ISRM Blue Book was published in 2007 (by the ISRM via the Turkish National Group) and contains the complete set of Suggested Methods from 1974 to 2006 inclusive. The papers in this most recent volume have been published during the last seven years in international journals, mainly in Rock Mechanics and Rock Engineering. They offer guidance for rock characterization procedures and laboratory and field testing and monitoring in rock engineering. These methods provide a definitive procedure for the identification, measurement and evaluation of one or more qualities, characteristics or properties of rocks or rock systems that produces a test result.

We are hearing a LOT about renewable energy these days! But unlike most available resources on alternative energy that focus on politics and economic impacts, da Rosa's practical guide, Fundamentals of Renewable Energy Processes, is dedicated to explaining the scientific and technological principles and processes that enable energy production from safe, renewable, clean sources. Advances in the renewable energy sphere are proceeding with an unprecedented speed, and in order for the world's alarming energy challenges to be solved, solid, up-to-date resources addressing the technical aspects of renewables are essential. This new, updated 2e of da Rosa's successful book continues to give readers all the background they need to gain a thorough understanding of the most popular types of renewable energy—hydrogen, solar power, biomass, wind power, and hydropower—from the ground up. The latest advances in all these technologies are given particular attention, and are carefully contextualized to help professionals and students grasp the "whys and hows" behind these breakthroughs. Discusses how and why the most popular renewable energy sources work, including wind, solar, bio and hydrogen Provides a thorough technical grounding for all professionals and students investigating renewable energy The new 2e of a highly regarded guide written by an internationally renowned pioneer

CHOICE Outstanding Academic Title 2016 Genocide and Gender in the Twentieth Century brings together a collection of some of the finest Genocide Studies scholars in North America and Europe to examine gendered discourses, practices and experiences of ethnic cleansing and genocide in the 20th century. It includes essays focusing on the genocide in Rwanda, the Armenian genocide in the Ottoman Empire, the Holocaust and ethnic cleansing and genocide in the former Yugoslavia. The book looks at how historically- and culturally-specific ideas about reproduction, biology, and ethnic, national, racial and religious identity contributed to the possibility for and the unfolding of genocidal sexual violence, including mass rape. The book also considers how these ideas, in conjunction with discourses of femininity and masculinity, and understandings of female and male identities,

contributed to perpetrators' tools and strategies for ethnic cleansing and genocide, as well as victims' experiences of these processes. This is an ideal text for any student looking to further understand the crucial topic of gender in genocide studies.

This book provides the first comprehensive picture of lifelong learning and the radical changes needed if it is to become the cultural norm. Clearly written and readily accessible, the book identifies the shifts in attitude and behaviour which are needed to establish a lifelong learning culture. Looking ahead over the next quarter of a century, Jim Smith and Andrea Spurling show how government and learning providers must fundamentally reassess their use of time, space and finance. But, more than that, they also offer a practical, comprehensive and robust strategy for lifelong learning. Through trenchant analysis based on research commissioned by The Lifelong Learning Foundation, this book shows ways of confronting difficult choices and realizing the aim of comprehensive lifelong learning.
