From New York Times bestseller and Pulitzer Prize winner Junot Díaz comes a debut picture book about the magic of memory and the infinite power of the imagination. A 2019 Pura Belpré Honor Book for Illustration Every kid in Lola's school was from somewhere else. Hers was a school of faraway places. So when Lola's teacher asks the students to draw a picture of where their families immigrated from, all the kids are excited. Except Lola. She can't remember The Island—she left when she was just a baby. But with the help of her family and friends, and their memories—joyous, fantastical, heartbreaking, and frightening—Lola's imagination takes her on an extraordinary journey back to The Island. As she draws closer to the heart of her family's story, Lola comes to understand the truth of her abuela's words: "Just because you don't remember a place doesn't mean it's not in you." Gloriously illustrated and lyrically written, *Islandborn* is a celebration of creativity, diversity, and our imagination's boundless ability to connect us—to our families, to our past and to ourselves.

In *Project-Based Learning Applied to the Language Classroom*, the authors propose a way to develop PBL in the language classrooms taking into account all of the obstacles and specifics involved in teaching a foreign language. It is about teaching English as a second or foreign language using Project-Based Learning (PBL). We approach this combination because many people seem to think about implementing PBL in their language classes and ask questions about how to do it, but feel that there aren't enough materials based on this methodology. In fact, most researchers and writers we have come across discuss the applications of PBL in the students' mother tongue to subjects such as Math, History, Literature, Social Studies, and Science. However, there are few published works about the specifics of PBL in foreign language classes. Besides, it seems obvious to us that the main difficulty in developing projects in a second or foreign language lies exactly on the fact that communication may be hindered when students do not have enough knowledge in the target language.

"...a masterful presentation of grammar--a well-structured, incremental course in diagramming with clear explanations and memorable illustrations of each new principle... Phyllis Davenport understands that if you want to make yourself understood, you need grammar. Her textbook abounds with examples of the ambiguities that result from an ignorance of grammatical rules...The art of diagramming sentences provides students with an indispensable foundation for the study of grammar, and Rex Barks makes the process of learning this skill manageable and fun. The book is laid out in logical, incremental steps, and students are given the opportunity to master one concept before proceeding to the next...It contains many clever devices to

help students with tricky concepts (e.g., prepositions are to be remembered as "anything a squirrel can do to a tree.") And it is pervaded by her sense of humor and enthusiasm for her subject. - Lisa VanDamme - Director, VanDamme Academy
