What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read Amusing Ourselves to Death, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. Amusing Ourselves to Death is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant,

powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one."
-Jonathan Yardley, The Washington Post Book World

Meeting the Needs of Parents Pregnant and Parenting After Perinatal Loss Vintage

Coping With Loss describes the many ways in which people cope with the death of someone they love. Most earlier books on bereavement have fallen into two categories: distillations of the clinical experience of individual therapists or collections of chapters reporting the results of empirical studies. Each category is valuable but has tended to serve a narrow group of readers--practitioners with particular theoretical orientations or researchers in quest of the latest findings. Coauthored by a leading research psychologist and an experienced therapist who specializes in bereavement education and intervention, this book is different. The authors weave together the strands of theory, research, and clinical wisdom into a seamless and readable narrative. While they discuss previous work, they also present new data, never before published, from one of the largest studies of bereaved people ever conducted, the Bereavement Coping Project. Unlike most studies to date, which focused on only one type of bereaved group (usually widows

or widowers), the Bereavement Coping Project examined the experiences of several different groups during the first 18 months after the death. The groups included those who had lost a spouse, a parent, an adult sibling, or a child; and those who had lost their significant other to cancer or cardiovascular disease on one hand as opposed to the stigmatized disease of AIDS on the other. The book begins with a critical overview of theories of bereavement; succeeding chapters explore in depth the impact of specific types of loss, the impact of particular coping strategies on recovery; the impact of social supports and religion, and the special cases of children and of people who seem to grow and change for the better after a loss. A final chapter considers implications for intervention with bereaved people. Each chapter is richly illuminated with real-life examples throughout and ends with a section called "Voices" in which bereaved people describe their various attempts to cope in their own words. Insightful and informative.

Sula and Nel are born in the Bottom—a small town at the top of a hill. Sula is wild, and

daring; she does what she wants, while Nel is well-mannered, a mamma's girl with a questioning heart. Growing up they forge a bond stronger than anything, stronger even than the dark secret they have to bear.

Strong enough, it seems, to last a lifetime—until, decades later, as the girls become women, Sula's anarchy leads to a betrayal that may be beyond forgiveness. One of The Atlantic's Great American Novels of the Past 100 Years Masterful, richly textured, bittersweet, and vital, Sula is a modern masterpiece about love and kinship, about living in an America birthed from slavery. Nobel Prize laureate Toni Morrison gives life to characters who struggle with what society tells them to be, and the love they long for and crave as Black women. Most of all, they ask: When can we let go? What must we hold back? And just how much can be shared in a friendship?

Becoming Routledge

The psychoanalytic process is characterized by a complex weave of interrelated polarities: transference and countertransference, repetition and new experience, enactment and interpretation, discipline and personal responsiveness, the intrapsychic and the interpersonal, construction and discovery. In Ritual and Spontaneity in the

Psychoanalytic Process, Irwin Z. Hoffman, through compelling clinical accounts, demonstrates the great therapeutic potential that resides in the analyst's struggle to achieve a balance within each of these dialectics. According to Hoffman, the psychoanalytic modality implicates a dialectic tension between interpersonal influence and interpretive exploration, a tension in which noninterpretive and interpretive interactions continuously elicit one another. It follows that Hoffman's "dialectical constructivism" highlights the intrinsic ambiguity of experience, an ambiguity that coexists with the irrefutable facts of a person's life, including the fact of mortality. The analytic situation promotes awareness of the freedom to shape one's life story within the constraints of given realities. Hoffman deems it a special kind of crucible for the affirmation of worth and the construction of meaning in a highly uncertain world. The analyst, in turn, emerges as a moral influence with an ironic kind of authority, one that is enhanced by the ritualized aspects of the analytic process even as it is subjected to critical scrutiny. An intensely clinical work, *Ritual and Spontaneity in the Psychoanalytic Process* forges a new understanding of the curative possibilities that grow out of the tensions, the choices, and the constraints inhering in the intimate encounter of a psychoanalyst and a patient. Compelling reading for all analysts and analytic therapists, it will also be powerfully informative for scholars in the social sciences and the humanities.

Acclaimed as a modern dramatic masterpiece, *Rosencrantz & Guildenstern are Dead* is the fabulously inventive tale of Hamlet as told from the worm's-eye view of the bewildered Rosencrantz and Guildenstern, two minor characters in Shakespeare's play. In Tom Stoppard's best-known work, this Shakespearean Laurel and Hardy finally get a chance to take the lead role, but do so in a world where echoes of *Waiting for Godot* resound, where reality and illusion intermix, and where fate leads our two heroes to a tragic but inevitable end. Tom Stoppard was catapulted into the front ranks of modern playwrights overnight when *Rosencrantz and Guildenstern Are Dead* opened in London in 1967. Its subsequent run in New York brought it the same enthusiastic acclaim, and the play has since been performed numerous times in the major theatrical centers of the world. It has won top honors for play and playwright in a poll of London Theater critics, and in its printed form it was chosen one of the "Notable Books of 1967" by the American Library Association.

In *Spatializing Social Justice: Literary Critiques* Maryann P. DiEdwardo uses seven literary critiques and seven reflections to share her newest research about the healing power of literature. DiEdwardo argues that

literacy is the lifelong intellectual process of gaining meaning from a critical interpretation of written or printed text. Literary critiques explore the writer's mind for symbolism hidden within the words, and writers of literary critiques listen to their own voices first. In this book, DiEdwardo touches upon different types of writing and writers who aim to explore the healing process through words.

The Routledge International Handbook of Dialectical Thinking is a landmark volume offering a multi-disciplinary compendium of the research, theory and practice that defines dialectical thinking, its importance and how it develops over the lifespan. For the first time, this handbook brings together theory and research on dialectical thinking as a psychological phenomenon from early childhood through the human lifespan. Grounding dialectical thinking in multiple philosophical traditions stemming from antiquity, it explores current psychological models of such thought patterns and shows how these can be applied in everyday life and across multiple disciplines, including philosophy, physics, mathematics and international relations. The handbook explains

the nature of dialectical thinking, why it is important and how it can be developed in children and in adults. It concludes with a final chapter depicting a discussion among the authors, exploring the question "how could dialectical thinking be the antidote to dogma" Written by a group of international scholars, this comprehensive publication is an essential reference for researchers and graduate students in psychology and the social sciences, as well as scholars interested in integrating different perspectives and issues from a wide variety of disciplines.
