How would you modify the dichotomous key to reflect this new information? The dichotomous key in Table 5.1 provides very broad and general identifications with low taxonomic resolution, or specificity (e.g., it stops at the order level, distinguishing frogs, salamanders, and caecilians). Compare this key to other dichotomous keys in this module.

Dichotomous Key To Salamanders Answer

Salamander Key - BIOLOGY JUNCTION

Dichotomous keys are very useful for identifying an organism as a member of a single, closely-related group of organisms. In many environments this is sufficient to fully identify the species.

However, complications may arise if multiple closely-related species, which may have very similar characteristics, live in the same geographic area.
