What students are saying As a current student on this bumpy collegiate pathway, I stumbled upon Course Hero, where I can find study resources for nearly all my

courses, get online help from tutors 24/7, and even share my old projects, papers, and lecture notes with other students.

Salamander Key - BIOLOGY JUNCTION

How would you modify the dichotomous key to reflect this new information? The dichotomous key in Table 5.1 provides very broad and general identifications with low taxonomic resolution, or specificity (e.g., it stops at the order level, distinguishing frogs, salamanders, and caecilians).

Compare this key to other dichotomous keys in this module.

Dichotomous Key to Salamanders

Introduction: A dichotomous key is constructed of a series of couplets, each consisting of two separate statements. For example: By reading the two statements of each couplet, you progress through the key from typically broad characteristics to narrower characteristics until only a single choice remains.

Chapter 18 Lab Dichotomous Keys

Use the following dichotomous key to correctly identify the species of salamanders designated in the pictures. Place the name of the salamander beside the number on the answer sheet. Classification key for Certain Salamanders 1. a. Hind limbs absent Siren

intermedia, siren b. Hind limbs present. Go to 2 2. a.

Dichotomous Key to Salamanders
- thomas.k12.ga.us

Dichotomous keys are very useful for identifying an organism as a member of a single, closely-related group of organisms. In many environments this is sufficient to fully identify the species. However, complications may arise if multiple closely-related species, which may have very similar characteristics, live in the same geographic area.
