Die Welt zu erkunden heißt, die Medien zu befragen, die sie erzeugen. Die Medienwissenschaft hat folglich das Potenzial, die Konstruktion und Vermittlung von Dingen wahrnehmbar und verstehbar zu machen. Die Beiträge\*innen entfalten dieses Potenzial vor dem Hintergrund dreier Perspektiven: dem Staunen, Rechnen und Rätseln. An welche Ästhetiken des Staunens knüpft die gegenwärtige Technologiediskussion an? Wie rechnen Computer mit, für und gegen den Menschen? Welche Rolle spielen Rätsel und Rätseln für die Mediengeschichte? Mit Fragen wie diesen gehen sie der Neuvermessung des nur scheinbar vertrauten Terrains der Medien nach.

Why were the Allies worried about an atom bomb attack by the Germans in 1944? Why did the Soviets threaten to use poison gas against the Germans? Why did Hitler in 1945 insist that holding Prague could win the war for the Third Reich? Why did US General George Patton's Third Army race for the Skoda works at Pilsen in Czechoslovakia instead of Berlin? Why did the US Army not test the uranium atom bomb it dropped on Hiroshima? Why did the Luftwaffe fly a non-stop round trip mission to within twenty miles of New York City in 1944? Reich of the Black Sun takes the reader on a scientific-historical journey in order to answer these questions. Arguing that Nazi Germany actually won the race for the atom bomb in late 1944, Reich of the Black Sun then goes on to explore the even more secretive research the Nazis were conducting into the occult, alternative physics and new energy sources. The book concludes with a fresh look at the "Nazi Legend" of the UFO mystery by examining the Roswell Majestic-12 documents and the Kecksburg crash in the light of parallels with some of the super-secret black projects being run by the SS. Reich of the Black Sun is must-reading for the researcher interested in alternative history, science, or UFOs!

Ausgangspunkt unserer Fragestellung ist die prinzipielle Unerkennbarkeit Gottes, die in der jüdisch-christlichen Tradition fest verankert ist (Ex 33,20; Jh 1,18). Ebenso fest verankert ist die anthropologische Aussage, dass der Mensch nach dem Ebenbild Gottes geschaffen wurde (Gen 1,26-27). Die hier versammelten Beiträge untersuchen in einer interdisziplinären Perspektive, wo und in welcher

Weise ein Weg von der Theologie zur Anthropologie und zurück führt. Der Band gliedert sich in folgende Sektionen: Negative Theologie und Gottes Unerkennbarkeit Der Mensch als Bild Gottes Die Ambivalenz des Begehrens Tiefe und Abgrund Der Band baut Brücken zwischen Ost und West, zwischen Geschichte und Gegenwart: jüdische, pagan-religiöse, neutestamentliche, frühchristliche und mittelalterliche Schriften kommen ins Gespräch mit Positionen gegenwärtiger systematischer Theologie und Philosophie. Die Beiträge zeichnen Grundlinien einer Anthropologie, die den bodenlosen Abgrund in eine unausschöpfliche Tiefe verwandelt, die zum unaussprechlich Göttlichen hinführt.

This volume introduces ten emerging voices in German-language literature by women. Their texts speak to the diverse modalities of transition that characterise society and culture in the twenty-first century, such as the adaptation to evolving political and social conditions in a newly united Germany; globalisation, the dissolution of borders, and the changing face of Europe; dramatic shifts in the meaning of national, ethnic, sexual, gender, religious, and class identities; rapid technological advancement and the revolutionary power of new media, which in turn have radically altered the connections between public and private, personal and political. In their literature, the authors presented here reflect on the notion of transition and offer some unique interventions on its meaning in the contemporary era.

A comprehensive and in-depth look at the early 'flying saucer technology' of Nazi Germany and the genesis of early man-made UFOs. From captured German scientists, escaped battalions of German soldiers, secret communities in South America and Antarctica to today's state-of-the-art 'Dreamland' flying machines, the astonishing book blows the lid off the 'Government UFO Conspiracy'. Examined in detail are secret underground airfields and factories; German secret weapons; 'suction' aircraft; the origin of NASA; gyroscopic stabilisers and engines; the secret Marconi aircraft factory in South America, and other secret societies, both ancient and modern, that have kept this craft a secret, and much more.

David Childress, popular author and star of the History Channel show Ancient Aliens, brings us the amazing story of the German Andromeda craft, designed and built during WWII. Along with flying disks, the Germans were making long, cylindrical airships that are commonly called motherships-large craft that house several smaller disk craft. It was not until 1989 that a German researcher named Ralf Ettl, living in London, received an anonymous packet of photographs and documents concerning the

planning and development of at least three types of unusual craft—including the Andromeda. Ettl went on to make several television documentaries based on the material in the packet and released most of the documents and photos to researchers in Austria and other parts of Europe. What the Ralf Ettl document dump shows us is what many have suspected for a long time: that WWII did not end in the manner in which we have been told, and a remnant of the Nazi military—particularly the SS—continued to operate aircraft and submarines around the world in the decades after the end of the war. Much of this activity has been attributed to UFO activity, but Childress lifts the veil shrouding some of these cases and shows that Andromeda and Haunebu craft were involved in many of these incidents over the decades. Join Childress as he shows us the secret files involving the Andromeda, Haunebu, and Vrill craft. Chapters include: Gravity's Rainbow; The Motherships; The MJ-12, UFOs and the Korean War; The Strange Case of Reinhold Schmidt; Secret Cities of the Winged Serpent; The Green Fireballs; Submarines That Can Fly; The Breakaway Civilization; more. Includes a 16-page color section. Over 120 photographs and diagrams.

Immortal Austria was the title of a theatrical pageant devised by Austrian refugees in wartime London, the name summarizing their collective memory of their homeland as a country of mountain scenery, historical grandeur and musical refinement. The reality of the country they had left, and the one to which some of them returned, was very different. This volume contains various studies of the representations of their homeland in the cultural production of Austrian exiles, including those projected by émigrés working in the British film industry, those portrayed in the historical novel and in the literary works of such notable authors as Stefan Zweig, Elias Canetti and Robert Neumann. It opens with a survey of the make-up of the Austrian exile community and concludes with a study of attitudes to returning exiles, as reflected in the post-war literary journals. The volume thus offers students and teachers a vital cultural link between the pre-1934 Austria of the First Republic and the post-1945 Austria of the Second.

"In the honorable vein of elegant, gentleman thieves, comes Allmen, the colorful protagonist of Suter's beautifully observed, deliciously fun novel" (Noah Charney, author of *The Museum of Lost Art*). Johann Friedrich von Allmen, a bon vivant of dandified refinement, has exhausted his family fortune. Forced to downscale, Allmen inhabits the garden house of his former

Zurich estate, attended by his Guatemalan butler, Carlos. When not reading novels by Balzac and Somerset Maugham, he plays jazz on a Bechstein baby grand. Allmen's fortunes take a sharp turn when he meets Jojo, a stunning blonde whose lakeside villa contains five Art Nouveau bowls created by renowned French artist Émile Gallé and decorated with a dragonfly motif. Allmen, seeking to pay off mounting debts, absconds with the priceless bowls and embarks on a high-risk, potentially violent bid to cash them in. This is the first of a series of humorous, fast-paced detective novels devoted to a memorable gentleman thief who, with his trusted sidekick, Carlos, creates an investigative firm to recover missing precious objects. "A rollicking good time . . . Bestselling Swiss author Martin Suter may have a classic on his hands in this contemporary crime novel, the first of a series featuring the memorable character of Johann Friedrich von Allmen, gentleman thief." —The Winnipeg Free Press "Suter combines sleight-of-hand suspense with stunning art and slightly worn Old World elegance to create a smartly entertaining read . . . A classy puzzler." —Library Journal "The dark charms of Suter's novel are irresistible from the first pages." —Joshua Max Feldman, author of *Start Without Me*

In 1970 a photocopied manuscript began circulating among conspiracy researchers entitled 'Nomenclature of an Assassination Cabal' by William Torbitt (a pseudonym). The Torbitt Document was a damning expose of J Edgar Hoover, Lyndon Johnson, John Connally and Werner von Braun, among many others, for their role in the assassination of President John F Kennedy. This first published edition of the Torbitt Document emphasizes what the manuscript says about the link between Operation Paperclip Nazi scientists working for NASA, the Defence Industrial Security Command (DISC), the assassination of JFK, and the secret Nevada air base known as Area 51. The Torbitt Document illuminates the darker side of NASA, the Military Industrial Complex, and the connections to Mercury, Nevada, and the Area 51 complex which headquarters the 'secret space programme'.

The History of German film is diverse and multi-faceted. This volume can only suggest the richness of a film tradition that includes five distinct German governments [Wilhelmine Germany, the Weimar Republic, the Third Reich, the Federal Republic of Germany (West Germany), and the German Democratic Republic (East Germany), as well as a reunited Germany], two national industries (Germany and Austria), and a myriad of styles and production methods. Paradoxically, the political disruptions that have produced these distinct film eras, as well as and the natural inclination of artists to rebel and create new styles, allow for construction of a narrative of German film. Disjuncture generates distinct points of separation, and yet also highlights continuities between the ruptures. This second edition of Historical Dictionary of German Cinema contains a chronology, an introduction, appendixes and an extensive bibliography. The dictionary section has over 200 cross-referenced entries on directors, actors, films, cinematographers, composers, producers, and major historical events that greatly affected the direction and development of German cinema. This book is an excellent resource for students, researchers, and anyone wanting to know more about German cinema.
