A diesel engine is an internal ignition engine, which utilizes heat to burn the fuel. It has the highest thermal efficiency of any regular engine because of its high compression ratio. The average service life of a diesel engine is usually about 10 years. It then needs to be rebuilt or replaced from ...

[Engine tuning - Wikipedia](#)

Engine tuning is the adjustment or modification of the internal combustion engine or Engine Control Unit (ECU) to yield optimal performance and increase the engine's power output, economy, or durability. These goals may be mutually exclusive; an engine may be de-tuned with respect to output power in exchange for better economy or longer engine life due to lessened stress on engine components.
