This is the first major collection of essays to look at the literature of the entire Tudor period, from the reign of Henry VII to death of Elizabeth I. It pays particularly attention to the years before 1580.

Those decades saw, amongst other things, the establishment of print culture and growth of a reading public; the various phases of the English Reformation and process of political centralization that enabled and accompanied them; the increasing emulation of Continental and classical literatures

under the influence of humanism; the self-conscious emergence of English as a literary language and determined creation of a native literary canon; the beginnings of English empire and the consolidation of a sense of nationhood. However, study of Tudor literature prior to 1580 is not only of worth as a context, or foundation, for an Elizabethan 'golden age'. As this much-needed volume will show, it is also of artistic, intellectual, and cultural merit in its own right. Written by experts from Europe, North America, and the United Kingdom, the forty-five chapters in *The Oxford Handbook to Tudor Literature* recover some of the distinctive voices of sixteenth-century writing, its energy, variety, and inventiveness. As well as essays on well-known writers, such as Philip Sidney or Thomas Wyatt, the volume contains the first extensive treatment in print of some of the Tudor era's most original voices.

his most recent film *Inland Empire* (2006), David Lynch is best known for his unorthodox narrative style. An award-winning director, producer, and writer, Lynch distorts and disrupts traditional storylines and offers viewers a surreal, often nightmarish perspective. His unique approach to filmmaking has made his work familiar to critics and audiences worldwide, and he earned Academy Award nominations for Best Director for *The Elephant Man* (1980), *Blue Velvet* (1986), and *Mulholland Drive* (2001). Lynch creates a new reality for both characters and audience by focusing on the individual and embracing existentialism. In *The Philosophy of David Lynch*, editors William J. Devlin and Shai Biderman have compiled an impressive list of contributors to explore the philosophy at the core of the filmmaker's work. Lynch is examined as a postmodern artist, and the themes of darkness, logic, and time are discussed in depth. Other prominent issues in Lynch's films, such as *Bad faith* and *freedom*, *ethics*, *politics*, and *religion*, are also

considered. Investigating myriad aspects of Lynch's influential and innovative work, *The Philosophy of David Lynch* provides a fascinating look at the philosophical underpinnings of the famous cult director.

"Fitrah: Man's Natural Disposition" is a translation of the Persian book "Fi?rat" by the great Muslim thinker and reformer, Ayatollah Murtada Mutahhari. "Fitrah" is the theme of a 10-session lecture series given the martyred thinker in 1976-77. With ample citations from the Qur'an and other traditional Islamic sources,

---

Mutahhari discusses the concept of 'fitrah' or man's natural disposition. The author does not confine himself to Islamic references as he continuously engages with the views of a wide range of philosophers including Plato, William James, Russell, Nietzsche, Marx, Feuerbach, Auguste Comte, Spencer, Will Durant, and Durkheim, among others. Mutahhari's ontological discussion covers a range of issues, including the literal and technical meaning of 'fitrah', sacred inclinations, love and worship, and the evolution of human originality. He also examines materialism and provides a theistic approach to some issues pertaining to the theories on the origin of religion, the evolution of human society, intrinsic and acquired guidance, and intuitive and sensory dispositions. This book lays a significant interconnected and

deep foundation in Islamic theology and an understanding of human psychology, sociology and anthropology fully supported by the holy Quran, ahadith, logic and philosophy. The reader will leave with a holistic understanding of Islam and a true connection with the Almighty (SWT) through one own self.

humble stainless steel teaspoon are remarkably complicated and every stage involves risk, coal, energy, capital, international trade and finance. Stainless steel cutlery has taken thousands of years of experimentation and knowledge to evolve and the end result is that we can eat without killing ourselves with bacteria. We are in the best times to have ever lived on planet Earth and the future will only be better. All this we take for granted. Greens may have started as genuine environmentalists. Much of the green movement has now morphed into an unelected extremist political pressure group accountable to no one. Greens create problems, many of which are concocted, and provide no solutions because of a lack of basic knowledge. This book examines green policies in the light of established knowledge and shows that they are unrealistic. Policies by greens adopted by supine governments have resulted in rising costs, increased taxes, political instability, energy poverty, decreased longevity and environmental degradation and they don't achieve their ideological aims.
