The Corps of Engineers (CE) Test Procedures document has been prepared in a format similar to the referenced MIL-STD-705B test methods to provide for easy implementation by CE district and division personnel. The procedures provide for acceptance testing large diesel engine-generator sets--up to 6000 kW capacity range--intended for installation in fixed military facilities as Class A (Prime), Class B (Standby), or Class C (Emergency) electrical power generation sources. This document provides a list of MIL-STD-705B test methods which are directly applicable for acceptance testing large diesel engine-generator sets. In addition, the document provides new test procedures numbered CE-TP-1001 through 1004, designed specifically for acceptance

testing large stationary diesel engine-generator sets intended for electrical power generation within fixed military facilities. (Author).
