Dietetic Assessment And Documentation
assessment is a systematic process of obtaining, verifying, and interpreting data in order to make decisions about the nature and cause of nutrition-related problems. Nutrition assessment requires making comparisons between the information obtained and reliable standards (ideal goals). Assessment provides the foundation for the nutrition diagnosis.

British Dietetic Association Homepage
The British Dietetic Association's Parenteral and Enteral Nutrition Group (PENG) has launched a Dietetic Outcomes Toolkit (DOT) to provide dietitians with a variety of approaches for measuring outcomes in dietetic care, with a particular focus on those relevant to nutrition support (oral, enteral and parenteral).

Dietetic Assessment And Documentation
Introduction. Nutritional assessment is the systematic process of collecting and interpreting information in order to make decisions about the nature and cause of nutrition related health issues that affect an individual (British Dietetic Association (BDA), 2012). This differs from nutritional screening (link to Screening and MUST page) which is a brief risk assessment which can be carried out by any healthcare professional and which may lead to a nutritional assessment by a dietetician.
