Dietitian's Guide to Assessment and Documentation offers an investigative approach to nutrition assessment, reviewing the collection and analysis of evidence, exploring the underlying problems, and providing intervention to improve nutritional health.

#### **Dietetic Assessment And Documentation**

Introduction. Nutritional assessment is the systematic process of collecting and interpreting information in order to make decisions about the nature and cause of nutrition related health issues that affect an individual (British Dietetic Association (BDA), 2012). This differs from nutritional screening (link to Screening and MUST page) which is a brief risk assessment which can be carried out by any healthcare professional and which may lead to a nutritional assessment by a dietetician.

Dietitian's Guide to Assessment and Documentation takes an investigative approach to nutrition assessment – reviewing the collection and analysis of evidence to determine the real nutrition-related problem, understanding the underlying problem and its effect on nutritional status, and providing intervention to address the problem - thereby improving nutritional health.

#### Model and Process for Nutrition and Dietetic Practice

The documents published by the British Dietetic Association underpin the HCPC standards and the Nursing and Midwifery standards with more practical guidance. This Policy builds on the HCPC and BDA documents and standards and provides definitive local standards for the Trusts Nutrition and Dietetic Service.  
*Dietitian's Guide to Assessment and Documentation ...*  
It is used in the education of students; supporting the development of consultation skills and clinical reasoning. In practice it is integrated into accepted documentation standards, supporting dietetic outcome collection as well as an agreed structure for paper and/or electronic dietetic records.

The British Dietetic Association's Parenteral and Enteral Nutrition Group (PENG) has launched a Dietetic Outcomes Toolkit (DOT) to provide dietitians with a variety of approaches for measuring outcomes in dietetic care,

with a particular focus on those relevant to nutrition support (oral, enteral and parenteral).
