Learn vocabulary, terms, and more with flashcards, games, and other study tools. *Diffusion Osmosis Questions And Answers* Often when a person is ill, the patient must be give fluids intravenously, (by injection directly into the blood vessel). Why must the person never be given pure water intravenously? Use the concepts of diffusion and osmosis. Best amd first answer will get 10pts.

Practice osmosis/diffusion question

Osmosis: a) is a special kind of diffusion. d) is the diffusion of water molecules only. e) is the diffusion of water molecules from a high concentration of water to a low concentration of water. f) requires a semi-permeable membrane. h) results in an even dispersal of water molecules. 5. A semi-permeable membrane is a membrane that:

Osmosis exam questions and mark scheme |

Teaching Resources

Osmosis is one of the methods through which solvents. This movement involves the transfer of water from a less concentrated solution to a more concentrated solution through a semipermeable membrane. Most people confuse it with diffusion which does not involve movement through a membrane. See how much you understood about osmosis in the class by taking the test below before the test.
