[Digestive System At Body Worlds](#)

The human digestive system It takes around 24 hours for your dinner to wind its way through the nine-metre-long digestive tract. On its trip, it ' s mixed with acids and digestive juices, and squeezed and squelched until all the nutrients that the body needs are absorbed.

Digestive. The largest parts of the digestive system include: Esophagus: A hollow tubular organ in the neck and chest area that connects the mouth to the stomach. Muscles here propel food to the stomach. Stomach: A large organ that holds and digests food through a cocktail of enzymes and acids. Food remains here for two to eight hours.
