### Human - BODY WORLDS

The Digestive System. All  
processes in our body need  
energy that we retrieve  
from food. In order to  
convert it into energy, food  
must be fragmented down  
into its components. The  
organs of the digestive tract  
split the food both  
mechanically and  
chemically and allow  
nutrients to pass into the  
blood and with this, into  
each individual cell.
