With these issues the subject of legal usability is not completely covered. Enforcement is perhaps the most obvious issue that is not dealt with. There fore I will indicate for what reason enforcement has been omitted as a sepa rate issue. This has the following background. A signature may alleviate eviden tiary burdens that may arise when enforcing a contract, but enforcing a contract involves much more than evidence of the existence and contents of a contract. E-commerce has opened the possibility to engage in cross border business with a low value per transaction. Even if one has the authenticated identity of one's contracting party, it may still be too complicated or expensive to commence legal proceedings against a party. A signature does not in itself result in compliance with contracts and legal rules. A digital signature may, however, be an important part of a more encompassing enforcement concept. The security dimension of signatures only makes sense if one is really willing to embark upon enforcement (in stead of accepting the loss). Enforcement in the Internet environment is not something that can be done on an ad hoc basis. The territorial division of the law hampers enforcement in the borderless Internet envi ronment: each country has its own system for determining and adminis tering law. Furthermore, traditional courts are not as yet tailored to the enforcement needs that originate from the Internet.

This book constitutes the thoroughly refereed post-proceedings of the 5th International Conference on Information Security and Cryptology, ICISC 2002, held in Seoul, Korea in November 2002. The 35 revised full papers presented together with an invited paper were carefully selected from 142 submissions during two rounds of reviewing and improvement. The papers are organized in topical sections on digital signatures, Internet security, block ciphers and stream ciphers, stream ciphers and other primitives, efficient implementations, side-channel attacks, cryptographic protocols and biometrics.

In the past six years, more than 55 countries have begun adopting UNCITRAL's (United National Commission on International Trade Law) Model Laws of 1999 and 2001 regarding the use and validity of e-signatures. Dozens of pieces of legislation and legislative proposals now exist around the world on the subject of e-signatures. While the model laws may look the same on paper, in practice they can vary widely. Finally, you can be certain that your clients are in compliance when using digital signatures. The Center for International Legal Studies, in cooperation with UNCITRAL, has gathered experts in over 25 jurisdictions to analyze the impact of these standards in their respective domestic e-commerce regimes. These experts show how the Model Laws are actually implemented today in each of these countries. Now you can have on-the-ground feedback about how UNCITRAL's Uniform Rules on Electronic Signatures, the Model Law on Electronic Commerce 1996, and the Model Law on Electronic Signatures 2001 are being implemented. A must have reference for: - Any lawyer working on a business transaction or contract using the Internet to exchange forms - Government Lawyers - Intellectual Property Lawyers Topics covered include: - Application and enforceability of electronic transactions - Defining key terms, including 'writing, 'signature, 'and 'original' documents - Legal recognition of data messages - Formation of contracts - Attribution of data messages - Retention of data messages - Trustworthiness of e-signature - Electronic Commerce Analyzes the global impact of: - UNCITRAL's Uniform Rules on Electronic Signatures - Model Law on Electronic Commerce 1996 - Model Law on Electronic Signatures 2001

The book has been written for 'Business Laws' Paper of the B. Com. (Hons.), Semester-I, Examination of the University of Delhi in accordance with its semester based syllabus. Its contents have been largely extracted from the author's reputed title Business Law which has gained tremendous readership over the years. This book presents the subject matter tailor-made as per the revised course structure of the Paper, to enable the students to possess a textbook that caters to their needs in full. The book has been organized into four parts, namely, Law of Contract, Law of Sale of Goods, Law of Limited Liability Partnership, and Law of Information Technology. KEY FEATURES • Quotes Indian and English cases at appropriate places with a view to ensure necessary authenticity and clarity on the subject. • Includes text questions and practical problems with hints and solutions in each chapter to enable students to evaluate their understanding of the subject • Explains complicated provisions in easily comprehensible language with the help of illustrations and analogies

This volume constitutes the refereed proceedings of the 3rd International Conference on Advanced Communication and Networking, ACN 2011, held in Brno, Czech Republik, in June 2011. The 57 revised full papers presented in this volume were carefully reviewed and selected from numerous submissions. The papers focus on the various aspects of progress in Advanced Communication and Networking with computational sciences, mathematics and

information technology and address all current issues of communication basic and infrastructure, networks basic and management, multimedia application, image, video, signal and information processing.

This book features a collection of high-quality research papers presented at the International Conference on Tourism, Technology and Systems (ICOTTS 2022), held at University of Chile, Santiago de Chile, Chile, from 3 to 5 November 2022. The book is divided into two volumes, and it covers the areas of technology in tourism and the tourist experience, generations and technology in tourism, digital marketing applied to tourism and travel, mobile technologies applied to sustainable tourism, information technologies in tourism, digital transformation of tourism business, e-tourism and tourism 2.0, big data and management for travel and tourism,

geotagging and tourist mobility, smart destinations, robotics in tourism, and information systems and technologies.

Electronic Signatures in International Contracts Springer

Electronic signatures are ubiquitous. Anyone sending an e-mail or using a credit card uses one. They can have a bearing on all areas of law, and no lawyer is immune from having to advise clients about their legal consequences. This third edition provides an exhaustive discussion of what constitutes an electronic signature, the forms an electronic signature can take and the issues relating to evidence, formation of contract and negligence in respect of electronic signatures. Case law from a wide range of common law and civil law jurisdictions is analysed to illustrate how judges have dealt with changes in technology in the past and how the law has adapted in response.

series started in 1998 in Toronto, Canada. The worldwide reach of the Internet allows malicious cyber criminals to coordinate and launch attacks on both cyber and cyber-physical infrastructure from anywhere in the world. This purpose of this handbook is to introduce the theoretical foundations and practical solution techniques for securing critical cyber and physical infrastructures as well as their underlying computing and communication architectures and systems. Examples of such infrastructures include utility networks (e.g., electrical power grids), ground transportation systems (automotives, roads, bridges and tunnels), airports and air traffic control systems, wired and wireless communication and sensor networks, systems for storing and distributing water and food supplies, medical and healthcare delivery systems, as well as financial, banking and commercial transaction assets. The handbook focus mostly on the scientific foundations and engineering techniques - while also addressing the proper integration of policies and access control mechanisms, for example, how human-developed policies can be properly enforced by an automated system. Addresses the technical challenges facing design of secure infrastructures by providing examples of problems and solutions from a wide variety of internal and external attack scenarios Includes contributions from leading researchers and practitioners in relevant application areas such as smart power grid, intelligent transportation systems, healthcare industry and so on Loaded with examples of real

Since then, every year, there has been an international workshop on the technological challenges of electronic commerce, and every other year, in conjunction with the workshop, an international symposium on electronic commerce is held. The following workshops have been held so far. • The first International Workshop on the Technological Challenges of Electronic Commerce was held in September 1998, in Toronto, Canada. • The second International Workshop on the Technological Challenges of Electronic Commerce was held in May 1999, in Beijing, China. • The third International Workshop on the Technological Challenges of Electronic Commerce was held in June 2000, in Waterloo, Canada • The fourth International Workshop on the Technological Challenges of Electronic Commerce was held in April 2001, in Hong Kong. The first International Symposium on Electronic Commerce was held in Beijing, China, May 1999, in conjunction with the second International Workshop on the Technological Challenges of Electronic Commerce.

In the Information Society, the smart card, or smart device with its processing power and link to its owner, will be the potential human representation or delegate in Ambient Intelligence (Pervasive Computing), where every appliance or computer will be connected, and where control and trust of the personal environment will be the next decade challenge. Smart card research is of increasing importance as the need for information security grows rapidly. Smart cards will play a very large role in ID management in secure systems. In many computer science areas, smart cards introduce new dimensions and opportunities. Disciplines like hardware design, operating systems, modeling systems, cryptography and distributed systems find new areas of applications or issues; smart cards also create new challenges for these domains. CARDIS, the IFIP Conference on

Smart Card Research and Advanced Applications, gathers researchers and technologists who are focused in all aspects of the design, development, deployment, validation and application of smart cards or smart personal devices. This volume contains the 20 papers that have been selected by the CARDIS Program Committee for presentation at the 6th International Conference on Smart Card Research and Advanced Applications (CARDIS 2004), which was held in conjunction with the IFIP 18th World Computer Congress in Toulouse, France in August 2004 and sponsored by the International Federation for Information Processing (IFIP). With 20% of the papers coming from Asia, 20% from America, and 60% from Europe, the competition was particularly severe this year, with only 20 papers selected out of 45 very good submissions. Smart Card Research and Advanced Applications VI presents the latest advances in smart card research and applications, and will be essential reading for developers of smart cards and smart card applications, as well as for computer science researchers in computer architecture, computer security, and cryptography.

Income Tax & GST For B.Com Semester VIth of Calicut University Springer

Largest Selling Book since 1964 and over the last 58 years of its existence, the book has established a reputation for itself as the most definitive work on the subject of income tax. Even the last minute changes in the law have been incorporated in this revised edition of the book and as such it is the latest and most update book on Income Tax for the Assessment Year 2022-23. Further, the amendments

Other Laws (Relaxation and Amendment of Certain Provisions) Act, 2021, applicable for the Assessment Year 2022-23, have been incorporated in the book. In the chapter Preparation and Filing of Return of Income, details and new features of new E-filing Website of the Income Tax Department launched on 7.6.2021 has been included. In the chapter of Deduction and Collection of Tax at Source newly inserted sections 194R and 194S of the Income Tax Act, applicable from 01.07.2022 have been included. A simplified, systematic approach to the understanding of a complex subject written in a unique, simple and easy to understand language. Each topic, after a theoretical exposition, is followed by illustrations to facilitate the students to master the practical application of Income Tax Law. User-friendly examination-oriented style facilitating easy comprehension of each topic. Solved Illustrations and Questions for exercise are largest in number in comparison to other books on income tax. Unsurpassed for over 58 years. The book is trusted and relied upon for accuracy and reliability. Mistakeless printing on paper of superior quality at moderate price. Latest question Paper of Calicut University has been included in the revised edition of the book. At the end of each chapter, Short Answer, Objective Type and Short Numerical Questions have been added with answers.

This book presents the latest innovative

research findings, methods, and development techniques related to intelligent social networks and collaborative systems, intelligent networking systems, mobile collaborative systems, and secure intelligent cloud systems. Offering both theoretical and practical perspectives, it also reveals synergies among various paradigms in the multi-disciplinary field of intelligent collaborative systems. With the rapid development of the Internet, we are experiencing a shift from the traditional sharing of information and applications as the main purpose of the Web to an emergent paradigm that places people at the very centre of networks, making full use of their connections, relations, and collaboration. Social networks also play a major role in the dynamics and structure of intelligent Web-based networking and collaborative systems. Virtual campuses, communities and organizations strongly leverage intelligent networking and collaborative systems through a wide variety of formal and informal electronic relations, such as business-to-business, peer-to-peer, and many types of online collaborative learning interactions, including the emerging e-learning systems. This has resulted in entangled systems that need to be managed efficiently and autonomously. In addition, while the latest powerful technologies based on grid and wireless infrastructures as

well as cloud computing are currently greatly enhancing collaborative and networking applications, they are also facing new challenges. The principal purpose of the research and development community is to stimulate research that will lead to the creation of responsive environments for networking and, in the long term, the development of adaptive, secure, mobile, and intuitive intelligent systems for collaborative work and learning.

Enabling system, network, and security administrators to master Registry concepts and architecture, this book provides a historical overview of the Registry and outlines the differences between Windows 9x/ME and Windows NT/2000/XP/.NET Registries. Special attention is given to the enhancements in Registry architecture introduced with Windows XP and .NET such as faster queries and removal of the registry size limitation. Administrators are shown how to properly use Registry features, plan and implement the most appropriate Registry backup strategy, and monitor and modify the system registry according to the administrative requirements and the security policy adopted by the organization with respect to the needs of end-users. Total coverage is provided of the Windows XP and Windows .NET reliability enhancements such as Volume Snapshot Service, Windows File Protection, Automated System Restore, Driver Rollback, and Recovery Console. Advanced topics include Plug and Play implementation; device management including support for

Smart devices such as Pocket PC, SmartPhone 2002, and Tablet PC; power management feature; and the role of the system Registry in the boot process.
