In the Zombie apocalypse the last vampire on Earth has a hell of time keeping his food alive...
A Vampire In Zombieland
Coburn's been dead now for close to a century, but seeing as how he's a vampire and all, it doesn't much bother him. Or at least it didn't, not until he awoke from a forced five-year slumber to discover that most of human civilization was

now dead – but not dead like him, oh no. See, Coburn likes blood. The rest of the walking dead, they like flesh. He's smart. Them, not so much. But they outnumber him by about a million to one. And the clotted blood of the walking dead cannot sustain him. Now he's starving. And on the run. And more pissed-off than a beestung rattlesnake. The vampire not only has to find human survivors (with their sweet, sweet blood), but now he has to

transition from predator to protector – after all, a man has to look after his food supply.
New Under the Sun Skyscape
A gripping sci-fi tech thriller, set in the eye-opening, paranoid world of the electrifying Zeroes—from the New York Times–bestselling author of *Wanderers*.
Hannah Stander is a consultant for the FBI—a futurist who helps the Agency with cases that feature demonstrations of bleeding-

edge technology. It's her job to help them identify unforeseen threats: hackers, AIs, genetic modification, anything that in the wrong hands could harm the homeland. Hannah is in an airport, waiting to board a flight home to see her family, when she receives a call from Agent Hollis Copper. "I've got a cabin full of over a thousand dead bodies," he tells her. Whether those bodies are all human, he doesn't say.

What Hannah finds is a horrifying murder that points to the impossible—someone weaponizing the natural world in a most unnatural way. Discovering who—and why—will take her on a terrifying chase from the Arizona deserts to the secret island laboratory of a billionaire inventor/philanthropist. Hannah knows there are a million ways the world can end, but she just might be facing one she could never have predicted—a new threat both

ancient and cutting-edge that could wipe humanity off the earth. "Enthralling . . . Wendig does an impeccable job blending fact and fiction as he describes invasive species and insects being used as biological weapons." —The Washington Post "Think Thomas Harris' Will Graham and Clarice Starling rolled into one and pitched on the knife's edge of a scenario that makes Jurassic Park look like a carnival ride. Another rip-roaring,

deeply paranoid thriller about the reasons to fear the future."

Internet chatrooms; and controversial developments in usage and grammar. It also analyzes English around the world, uncovering the latest words and phrases to enter our vocabulary; and explores what new words were hundreds of years ago, and how they've developed or disappeared. An ideal reference for all word lovers, this new book offers a fascinating tour of the English language today. The Kick-Ass Writer HarperCollins Modern technology is pitted against ancient dinosaurs in this

scientific thriller James Rollins calls “ Jurassic Park set amid the paradox of time travel. ” Paleontologist Richard Leyster is perfectly content in his position with the Smithsonian excavating dinosaur fossil sites and publishing his findings . . . until the mysterious Harry Griffin appears in his office with a cooler containing the head of a freshly killed Stegosaurus. The enigmatic stranger offers Leyster the opportunity to travel back in time to study living dinosaurs in their original habitats—but with strings attached. Soon, the paleontologist finds himself, along with a select team of colleagues—including his chief rival, the ambitious and often ruthless Dr. Gertrude

Salley—making discoveries that would prove impossible working from fossils alone. But when Leyster and his team are stranded in the Cretaceous, they must learn to survive while still keeping alive the joy of scientific discovery. This shocking novel spans hundreds of millions of years and deals with the ultimate fate not only of the dinosaurs but also of all humankind. Nominated for the Locus Award, the Hugo Award, and the Nebula Award for Best Novel, *Bones of the Earth* cements author Michael Swanwick as an author who “proves that sci-fi has plenty of room for wonder and literary values” (San Francisco Chronicle).

Beyond Dinocalypse HarperCollins With a new introduction by Kelly Link, the Locus Award-winning science fiction novel by legendary author Ursula K. Le Guin, set in a world where one man’s dreams rewrite the future. During a time racked by war and environmental catastrophe, George Orr discovers his dreams alter reality. George is compelled to receive treatment from Dr. William Haber, an ambitious sleep psychiatrist who quickly grasps the immense power George holds. After becoming adept at manipulating George’s dreams

to reshape the world, Haber seeks the same power for himself. George—with some surprising help—must resist Haber’s attempts, which threaten to destroy reality itself. A classic of the science fiction genre, *The Lathe of Heaven* is prescient in its exploration of the moral risks when overwhelming power is coupled with techno-utopianism. Goldilocks Villard “What would the world be like if the dinosaurs hadn't gone extinct? As this very funny book shows, for one thing, L.A. would be even weirder than it is now.” --Dave

Barry Vincent Rubio, a Los Angeles private investigator, is down on his luck: He's out of work. His car's been repossessed. His partner has died under mysterious circumstances. And his tail just won't stay put. Vincent is a dinosaur--a Velociraptor, to be precise. It seems the dinosaurs faked their extinction 65 million years ago and still roam the earth, disguised in convincing latex costumes that help them blend perfectly into human society. A heightened sense of smell allows the

dinos to detect one another--Vincent's got an odor like a tasty Cuban cigar. When Vincent is called to investigate a two-bit case of arson at a hip dino nightclub, he discovers something much more sinister, which lures him back to New York City--the scene of his partner's death and a dangerous nexus of dinosaur and human intermingling. Will Vincent solve the mystery of his partner's death? Will a gorgeous blond chanteuse discover his true identity, jeopardizing both

their lives? Will Vincent be able to conquer his dangerous addiction to basil, or will he wind up in Herba-holics Anonymous? Will he find true love, or resort to crumpled issues of Stegolicious? Somewhere between Jurassic Park and L.A. Confidential lies Eric Garcia's Anonymous Rex, one of the smartest, wittiest, and most entertaining debuts this side of the Ice Age. An exhilarating thrill-ride through the underbelly of cyber espionage in the vein of David Ignatius's *The Director* and the television series *Leverage*, *CSI: Cyber*, and *Person of Interest*, which follows five iconoclastic hackers who are coerced into serving the U.S. government. An Anonymous-style rabble rouser, an Arab spring hactivist, a black-hat hacker, an old-school ciphernpunk, and an online troll are each offered a choice: go to prison or help protect the United States,

putting their brains and skills to work for the government for one year. But being a white-hat doesn't always mean you work for the good guys. The would-be cyberspies discover that behind the scenes lurks a sinister NSA program, an artificial intelligence code-named Typhon, that has origins and an evolution both dangerous and disturbing. And if it's not brought down, will soon be uncontrollable. Can the hackers escape their federal watchers and confront Typhon and its mysterious creator? And what does the government really want them to do? If they decide to turn the tables, will their own secrets be exposed—and their lives erased like lines of bad code? Combining

the scientific-based, propulsive narrative style of Michael Crichton with the eerie atmosphere and conspiracy themes of *The X-Files* and the imaginative, speculative edge of Neal Stephenson and William Gibson, *Zer0es* explores our deep-seated fears about government surveillance and hacking in an inventive fast-paced novel sure to earn Chuck Wendig the widespread acclaim he deserves.

Bones of the Earth
Harper Voyager
Hugh had been taught that, according to the ancient sacred writings, the Ship was on a voyage to faraway Centaurus. But he also understood this was actually allegory for a voyage to spiritual perfection. Indeed, how could the Ship move, since its

miles and miles of metal corridors were all there was of creation? Science knew that the Ship was all the Universe, and as long as the sacred Convertor was fed, the lights would continue to glow and the air would flow, and the Creator's Plan would be fulfilled. Of course, there were the muties, grotesquely deformed parodies of humans, who lurked in the upper reaches of the Ship where gravity was weaker. Were they evil incarnate, or merely a divine check on the population,

keeping humanity from expanding past the capacity of the Ship to support? Then Hugh was captured by the muties and met their leader (or leaders), Joe-Jim, with two heads on one body. And he learned the true nature of the Ship and its mission between the stars. But could he make his people believe him before it was too late? Could he make them believe that he must be allowed to fly the ship?
