Broken Promises is the third book in a trilogy spanning 18 years. Bruce

Kushnick, author, senior telecom analyst and industry insider, lays out,

in all of the gory details, how America paid over \$400 billion to be the

first fully fiber optic-based nation yet ended up 27th in the world for

high-speed Internet (40th in upload speeds). But this is only a part of

this story. With over four million people filing with the FCC to 'Free

the Net', one thing is abundantly clear -- customers know something is

terribly wrong. Every time you pay your bills you notice that the price

of your services keeps going up, you don't have a serious choice for

Internet (ISP), broadband or cable service, much less competitors

fighting for your business, or maybe you can't even get very fast

broadband service. Worse, over the last few years, America's ISPs and

cable companies have been rated "the most hated companies in America". While Net Neutrality concerns (detailed in Broken Promises) are important, the actions are only a first step and will most likely be tied up in court for the next few years. More importantly, it does not resolve most of the customer issues and there is nothing else on the horizon that will fix what's broken. Broken Promises documents the massive overcharging and failure to properly upgrade the networks, the deceptive billing practices, the harms caused from a lack of competition, the gaming and manipulating of the regulatory system, from the states to the FCC, and exposes the companies' primary strategy: How much can we get away with? There has been little, if any, regard for the customers they serve.--From <http://newnetworks.com/bookbrokenpromises/> --(viewed on June 12, 2015).
