A List of Helpful Publications Concerning Vocational Instruction Cambridge University Press

This book examines minban teacher policies and their implementation in China between 1949 and 2000, when rural areas were in severe shortage of qualified teachers. During this period of time, minban teachers made great contributions to education, doing the same work as state-employed school teachers while receiving much lower salaries due to non-official status. With solid fieldwork on oral history of minban teachers and policy actors and deep examination of a wealth of policy documents in private and governmental archives, the author records the life history of minban teachers, the process of minban teacher policies, and the interaction between policies and individual strategies in M county (pseudonym), located in northern Jiangsu province of China. The book reveals many interesting and sometimes surprising findings about the characteristics of educational policy implementation in China. While China's minban teacher policies have come to an end, rural education continues to be a major concern of policymakers and researchers alike.

The book is an important piece of scholarship for the readers interested in rural education in China, and in how state, society, and culture interact to influence teacher policies and management in the Chinese context. Bulletin Kogan Page Publishers Now in its 44th edition, British Qualifications is the definitive one-volume guide to every qualification on offer in the United Kingdom. With full details of all institutions and organizations involved in the provision of further and higher education, this publication is an essential reference source for careers advisors, students and employers. It also includes a comprehensive and up-to-date description of the structure of further and higher education in the UK. The book includes information on awards provided by over 350 professional institutions and accrediting bodies, details of academic universities and colleges and a full description of the current framework of academic and vocational education. It is compiled and checked annually to ensure accuracy of information.

Sapna Book House (P) Ltd.

The main problems that prevent fast and high-quality document processing in electronic document management systems are insufficient and unstructured information, information redundancy, and the presence of large amounts of undesirable user information. The human factor has a significant impact on the efficiency of document search. An average user is not aware of the advanced option of a query language and uses typical queries. Development of a specialized software toolkit intended for information systems and electronic document management systems can be an effective solution of the tasks listed above. Such toolkits should be based on the means and methods of automatic keyword extraction and text classification. The

categorization (or classification) of texts into predefined categories has witnessed a booming interest in the last 10 years due to the increased availability of documents in digital form and the ensuing need to organize them. Thus, research on keyword extraction, advancements in the field, and possible future solutions is of great importance in current times. Developing a Keyword Extractor and Document Classifier: Emerging Research and Opportunities presents an information extraction mechanism that can process many kinds of inputs, realize the type of text, and understand the percentage of the keywords that has to be stored. This mechanism then supports information extraction and information categorization mechanisms. This module is used to support a text summarization mechanism, which leads—with the help of the keyword extraction module—to text categorization. It employs lexical and information retrieval techniques to extract phrases from the document text that are likely to characterize it and determines the category of the retrieved text to present a summary to the users. This book is ideal for practitioners, stakeholders, researchers, academicians, and students who are interested in the development of a new keyword extractor and document classifier method.

Annual Report of the Education Department
Cambridge University Press

《讀社論學英文》第六卷出版了，跟之前數卷一樣，第六卷同樣是配合新高中通識課程編制，將五十篇文章分成六個課題，包括「個人成長與人際關係」、「今日香港」、「現代中國」、「全球化」、「公共衛生」以及「能源科技與環境」，每個課題都涵蓋相關的熱門新聞議題，還設有詞彙介紹及練習，讓讀者在學好英語之餘，更可緊貼時事，洞悉世情。另外，書中還附有由外籍人士用純正英語朗讀每篇文章的錄音，藉此讓讀者提升聽和說英語的能力。準備應考中學文憑試的同學善用此書，當有助你在此試的通識科及英文科中考取佳績。

Nirali Prakashan

The biennial Digital Review of Asia Pacific is a comprehensive guide to the state-of-practice and trends in ICT for development (ICT4D) in Asia Pacific, carrying 31 updated country reports on the theme of ICT and education.

Syllabus for Secondary Schools, 1910 IGI Global

This book is written strictly for the first and second semester diploma students of engineering chemistry according to the revised syllabus. It aims to provide a thorough understanding of the chemical concepts, theories and principles in Engineering Chemistry in a clear and concise manner, so that the average students are able to grasp the intricacies of the subject. Explaining general concepts of atomic structure and chemical bond, the book covers all advanced topics such as acid – base theory, concentration of solutions, electrochemistry, corrosion, metallurgy, hydrocarbons, sources of water and its treatment, lubricants and adhesives, fuel, polymer and environmental chemistry. Each theoretical concept is well supported by illustrative examples. Besides, the book provides a large number of solved problems to reinforce the theoretical understanding of concepts. Each chapter contains glossary terms and provides short questions and long questions for practice. Previous year question papers and model questions with answers are appended at the end of the book to help students ace in examinations.

Calendar CRC Press

This is a reprinting with different page numbers of the first 30 pages of the Education Dept's Secondary education bulletin no. 27. In addition to the English syllabus, it includes a historical sketch of the use of academic syllabi in New York State and an introduction to the entire syllabus.

‘ CONCEPTS OF ELECTRICAL AND ELECTRONICS ENGINEERING ’ is

intended to be used as a text book for I Semester Diploma in Computer Science and Engineering. This book is designed for comprehensively covering all topics relevant to the subject. Each and every topic has been explained in a very simple language as per the syllabus prescribed by the Board of Technical Education, Karnataka. This book is divided into ten chapters: Chapter 1 - Electric Current and DC Circuits Chapter 2 - Electrostatics Chapter 3 - Electromagnetic Induction Chapter 4 - AC Fundamentals Chapter 5 - Transformers Chapter 6 - Protection of Electric and Electronic Circuits Chapter 7 - Motors Chapter 8 - Electronic Components Chapter 9 - Basics of Electronics Chapter 10 - Op-amp The text provides detailed explanations and uses numerous easy-to-follow examples accompanied by diagrams and step-by-step solutions. Illustrative problems are presented in terms of commonly used voltages and current ratings. To enhance the utility of the book, important points and review questions (objective and descriptive type) have been included at the end of each chapter. Model question papers have been provided to help students prepare better for the semester examinations. It is hoped that the book will be of immense use to teachers and students of Polytechnics. Suggestions for improvement in the future editions of this book will be appreciated. I wish to express my gratitude to MEI Polytechnic, Bangalore for providing me an opportunity to bring out this text book. I am grateful to Sri. Nitin S. Shah, M/s Sapna Book House, Bangalore for publishing this book. I am thankful to M/s Datalink, Bangalore for meticulous processing of the manuscript of this book.

Principles of Electrical Measurement Routledge
Online learning has increasingly been viewed as a possible way to remove barriers associated with

traditional face-to-face teaching, such as overcrowded classrooms and shortage of certified teachers. While online learning has been recognized as a possible approach to deliver more desirable learning outcomes, close to half of online students drop out as a result of student-related, course-related, and out-of-school-related factors (e.g., poor self-regulation; ineffective teacher-student, student-student, and platform-student interactions; low household income). Many educators have expressed concern over students who unexpectedly begin to struggle and appear to fall off track without apparent reason. A well-implemented early warning system, therefore, can help educators identify students at risk of dropping out and assign and monitor interventions to keep them on track for graduation. Despite the popularity of early warning systems, research on their design and implementation is sparse. *Early Warning Systems and Targeted Interventions for Student Success in Online Courses* is a cutting-edge research publication that examines current theoretical frameworks, research projects, and empirical studies related to the design, implementation, and evaluation of early warning systems and targeted interventions and discusses their implications for policy and practice. Moreover, this book will review common challenges of early warning systems and dashboard design and will explore design principles and data visualization tools to make data more understandable and, therefore, more actionable. Highlighting a range of topics such as curriculum design, game-based learning, and learning support, it is ideal for academicians, policymakers, administrators, researchers, education professionals, instructional designers, data analysts, and students.

Elasticity and Toughness PHI Learning Pvt. Ltd.

An ideal reference guide to introducing the IB Diploma in your school.

Production/operations Management JAYPEE BROTHERS PUBLISHERS

This is an inspirational and motivational book for students at University and/or College, as well as those who have aspirations of furthering their studies at

university and/ or college, post-matric. The contributors from various institutions of higher learning in South Africa share their secrets to success in this collection of experiences. The contributors share their philosophies of success: they share strategies they have employed which managed to assist them in graduating. Students, in particular, junior students, will benefit immensely from the comprehensive coverage of core study skills and learning strategies presented in a straightforward and relatable manner. The book also helps students avoid academic exclusion and inspires them to achieve academic excellence. However, this book does not only cover academic success. It also covers leadership and entrepreneurship which are necessary elements in today's fast and changing world. Unlike any other student success guide books that are currently on the market, this book is unique and offers a broad perspective from many students. Again, the book is written by people with a lived experience. It offers an insider view. This book was written by leaders of Faculty of Best Advisory-FBA, published and is distributed by Club Readership.

Early Warning Systems and Targeted Interventions for Student Success in Online Courses SAGE Publishing India

The biennial *Digital Review of Asia Pacific* is a comprehensive guide to the state-of-practice and trends in information and communication technologies for development (ICTD) in the Asia Pacific region. This fourth edition (2009-2010) features 30 economies and four sub-regional groupings. The chapters provide updated information on ICT infrastructure, industries, content and services, key programs, enabling policies and regulation, education and capacity building, open source, and research and development initiatives, as well as ICTD challenges in each of the economies covered. The common framework that underpins these reports allows readers to undertake a comparative analysis and assess progress across Asia Pacific. In addition, regional overviews provide a synthesis of ICTD trends, regulatory issues, and lessons for managing innovation in the network economy. The thematic chapters focus on issues in ICT in education, a key area in ICTD. The authors are

drawn from government, academe, industry and civil society, providing a broad perspective on the use of ICTs for human development.

A Complete Guide to Professional, Vocational and Academic Qualifications in the United Kingdom Sapna Book House (P) Ltd.

‘ **BASICS OF ELECTRICAL ENGINEERING AND ELECTRONIC COMPONENTS** ’ is intended to be used as a text book for I Semester Diploma in Electronics and Communication Engineering. This book is designed for comprehensively covering all topics relevant to the subject. Each and every topic has been explained in a very simple language as per the syllabus prescribed by the Board of Technical Education, Karnataka. This book is divided into eight chapters: Chapter 1 – Basics of Electricity Chapter 2 – Electrostatics Chapter 3 – Electromagnetic Induction Chapter 4 – AC Fundamentals Chapter 5 – AC Circuits Chapter 6 – Transformers Chapter 7 – Batteries, Relays and Motors Chapter 8 – Passive Components The text provides detailed explanations and uses numerous easy-to-follow examples accompanied by diagrams and step-by-step solutions. Illustrative problems are presented in terms of commonly used voltages and current ratings. To enhance the utility of the book, important points and review questions (objective and descriptive type) have been included at the end of each chapter.
