Recent acts of terror have exploded the myth that Indian youth is insulated from the global terrorism phenomenon and had little time for extremism. The communal riots post the 1992 incident, the rise of the Students Islamic Movement of India (SIMI) and the mutation of a section of aspiring Muslim youth into terrorists with the help of forces across the border. The story of home-grown jihadists would have been skewed had it not been for the testimonies of David Coleman Headley and Sarfaraz

Nawaz on the involvement of the Pakistan Inter-Services Intelligence, top Lashkar-e-Taiba leadership, the Al Qaida and the Karachi project, whose demon child the Indian Mujahideen is. This book is the first-ever attempt to link up jihadists all over India and trace their linkages with terrorists based in countries like Pakistan, Nepal, Sri Lanka, Bangladesh, United Arab Emirates, Oman, Yemen and Saudi Arabia.

Surface Water Records of Georgia IGI Global Generation and Utilization of Electrical Energy is a comprehensive text designed for undergraduate courses in electrical engineering. The text introduces the reader to the generation of electrical energy and then goes on to explain how this energy can be effectively utilized for various applications like welding, electric traction, illumination, and electrolysis. The detailed explanations of practical applications make this an ideal reference book both inside and outside the classroom.

Unconventional energy sources have gained and will continue to gain an increasing share of energy systems around the world. Today, hydrogen is recognized as a non-polluting energy carrier because it does not contribute to global warming if it is produced from renewable sources. Hydrogen is already part of today's chemical industry, but as an energy source, its rare advantages can only be obtained with the help of technologies. Currently, the fuel cell is considered the cleanest sustainable energy. With the development of fuel cells, hydrogen-based energy generation becomes a reality. Hydrogen Fuel Cell Technology for Stationary Applications is an essential publication that focuses on the advantages of hydrogen as a primary energy center and addresses its use in the sustainable future of stationary applications. While highlighting a broad range of topics including cost expectations, production methods, and social impact, this publication explores all aspects of the implementation and dissemination of fuel cell technology in the hope of establishing a sustainable marketplace for it. This book is ideally designed for fuel cell manufacturers, architects, electrical engineers, civil engineers, environmental engineers, advocates, manufacturers, mechanics, researchers, academicians, and students.

Once in life, have willingness to meet a rapist. You must wonder why you should! Don't you feel there is no need for a human to reach that level of insanity? Why do people attempt rape? Have you ever questioned? Rapists don't come from any other planet, they are born among us. The rape is a product of ignorance, the society and the system is equally responsible for such crime that is full of insanity and brutality of a human behavior. Rapes have been constantly ignored by naming it as an incident. In fact the rape can never be an incident. It is a malfunctioning of a human behavior which was ignored at first place.
