Mary Mapes's Truth (previously published as Truth & Duty) was made into the 2015 film Truth, starring Cate Blanchett, Robert Redford, Topher Grace and Elizabeth Moss. A riveting play-by-play of a reporter getting and defending a story that recalls All the President's Men, Truth puts readers in the center of the "60 Minutes II" story on George W. Bush's shirking of his National Guard duty. The firestorm that followed that broadcast--a conflagration that was carefully sparked by the right and fanned by bloggers--trashed Mapes' well-respected twenty-five year producing career, caused newsman Dan Rather to resign from his anchor chair early and led to an unprecedented "internal inquiry" into the story...chaired by former Reagan attorney general Richard Thornburgh. Truth examines Bush's political roots as governor of Texas, delves into what is known about his National Guard duty-or lack of service-and sheds light on the solidity of the documents that backed up the National Guard story, even including images of the actual documents in an appendix to the book. It is peopled with a colorful cast of characters-from Karl Rove to Sumner Redstone-and moves from small-town Texas to Black Rock-CBS corporate headquarters-in New York City. Truth connects the dots between a corporation under fire from the federal government and the decision about what kinds of stories a news network may cover. It draws a line from reporting in the trenches to the gutting of the great American tradition of a independent media and asks whether it's possible to break important stories on a powerful sitting president.

In the early nineteen thirties Ayi Tendulkar, a young journalist from a small town in Maharashtra, travelled to Germany to study. Within a short time he married Eva Schubring, his professor's daughter. Soon after the short-lived marriage broke up, Tendulkar, by now also a well-known journalist in Berlin, met and fell in love with the filmmaker Thea von Harbou, divorced wife of Fritz Lang, and soon to be Tendulkar's wife. Many years his senior, Thea became Tendulkar's support and mainstay in Germany, encouraging and supporting him in bringing other young Indian students to the

country. Hitler's coming to power put an end to all that, and on Thea von Harbou's advice, Tendulkar returned to India, where he became involved in Gandhi's campaign of non-cooperation with the British and where, with Thea's consent, he soon married Indumati Gunaji, a Gandhian activist. Caught up in the whirlwind of Gandhi's activism, Indumati and Tendulkar spent several years in Indian prisons, being able to come together as a married couple only after their release - managing thereby to comply with a condition that Gandhi had put to their marriage, that they remain apart for several years 'to serve the nation'. In this unique account, Indumati and Tendulkar's daughter, Laxmi Tendulkar Dhaul, traces the turbulent lives of her parents and Thea von Harbou against the backremove of Nazi Germany and Gandhi's India, using a wealth of documents, letters, newspaper articles and photographs to piece together the intermeshed histories of two women, the man they loved, their own growing friendship and two countries battling with violence and non-violence, fascism and colonialism. INSTANT NEW YORK TIMES BESTSELLER An NPR Best Book of the Year "A thorough and damning exploration of the incestuous relationship between Trump and his favorite channel." -The New York Times "A Rosetta Stone for stuff about this presidency that doesn't otherwise make sense to normal humans." -Rachel Maddow, MSNBC "Stelter's critique goes beyond salacious tidbits about extramarital affairs (though there are plenty of those) to expose a collusion that threatens the pillars of our democracy." -The Washington Post The urgent and untold story of the collusion between Fox News and Donald Trump from the New York Times bestselling author of Top of the Morning. While other leaders were marshaling resources to combat the greatest pandemic in modern history, President Donald Trump was watching TV. Trump watches over six hours of Fox News a day, a habit his staff refers to as "executive time." In January 2020, when Fox News began to downplay COVID-19, the President was quick to agree. In March, as the deadly virus spiraled out of control, Sean Hannity mocked "coronavirus hysteria" as a "new hoax" from the left. Millions of Americans took Hannity and Trump's words as truth--until some of them started to get sick. In Hoax, CNN anchor and chief media correspondent Brian Stelter tells the twisted story of the relationship between Donald Trump and Fox News. From the moment Trump glided down the golden escalator to announce his candidacy in the 2016 presidential election to his acquittal on two articles of impeachment in early 2020, Fox hosts spread his lies and smeared his enemies. Over the course of two years, Stelter spoke with over 250 current and former Fox insiders in an effort to understand the inner workings of Rupert Murdoch's multibillion-dollar media empire. Some of the confessions are alarming. "We don't really believe all this stuff," a producer says. "We just tell other people to believe it." At the center of the story lies Sean Hannity, a college dropout who, following the death of Fox News mastermind Roger Ailes, reigns supreme at the network that pays him \$30 million a year. Stelter describes the raging tensions inside Fox between the Trump loyalists and the few remaining journalists. He reveals

why former chief news anchor Shep Smith resigned in disgust in 2019; why a former anchor said "if I stay here I'll get cancer;" and how Trump has exploited the leadership vacuum at the top to effectively seize control of the network. Including never before reported details, Hoax exposes the media personalities who, though morally bankrupt, profit outrageously by promoting the President's propaganda and radicalizing the American right. It is a book for anyone who reads the news and wonders: How did this happen?

"My favorite book on fishing--a classic from one of my favorite writers." -John Randolph, former editor, Fly Fisherman Earthy and philosophical, practical yet speculative--this book is a wonderful and enduring portrait of a fisherman's temperament. Full of the late Harold F. Blaisdell's infectious humanity and wisdom, The Philosophical Fisherman, long out of print, is a classic. Blaisdell is always independent and original in his thinking. He refutes the widely held theory that game fish attack artificial lures because they believe them to be baitfish. He argues that fish do not fear leaders per se, but become alarmed only if the leader results in the unnatural movement of the bait or lure. He debunks the vaunted effectiveness of the artificial nymph, explores the best methods of wet and dry-fly fishing, and tests his theories against such gamefish as trout, smallmouth bass, landlocked salmon, walleyes, and northern pike. There is something here for everyone who fishes--including a persuasive argument that the average angler anywhere in the country can invariably find superb fishing with in hour's drive of his home. Skyhorse Publishing is proud to publish a broad range of books for fishermen. Our books for anglers include titles that focus on fly fishing, bait fishing, fly-casting, spin casting, deep sea fishing, and surf fishing. Our books offer both practical advice on tackle, techniques, knots, and more, as well as lyrical prose on fishing for bass, trout, salmon, crappie, baitfish, catfish, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home. *How to Identify & Resolve Radio-tv Interference Problems* Uitgeverij kleine Uil

The price we pay for the new strategies in database marketing that closely track desirable customers, offering them benefits in return for personal information. We have all been to Web sites that welcome us by name, offering us discounts, deals, or special access to content. For the most part, it feels good to be wanted—to be valued as a customer. But if we thought about it, we might realize that we've paid for this special status by turning over personal information to a company's database. And we might wonder whether other customers get the same deals we get, or something even better. We might even feel stirrings of resentment toward customers more valued than we are. In *Niche Envy*, Joseph Turow examines the emergence of databases as marketing tools and the implications this may have for media, advertising, and society. If the new goal of marketing is to customize commercial announcements according to a buyer's preferences and spending history—or even by race, gender, and political opinions—what does this mean for the twentieth-century tradition of equal access to product information, and how does it affect civic life? Turow shows that these marketing techniques are not wholly new; they have roots in direct marketing and product placement, widely used decades ago and recently revived and reimagined by advertisers as part of "customer relationship management" (known popularly as CRM). He traces the transformation of marketing techniques online, on television, and in retail stores. And he describes public reaction against database marketing—pop-up blockers, spam filters, commercial-skipping video recorders, and other ad-evasion methods. Polls show that the public is nervous about giving up personal data. Meanwhile, companies try to persuade the most desirable customers to trust them with their information in return for benefits. *Niche Envy* tracks the marketing logic that got us to this uneasy impasse.

Turbo Code Applications: a journey from a paper to realization presents c- temporary applications of turbo codes in thirteen technical chapters. Each chapter focuses on a particular communication technology utilizing turbo codes, and they are written by experts who have been working in related th areas from around the world. This book is published to celebrate the 10 year anniversary of turbo codes invention by Claude Berrou Alain Glavieux and Punya Thitimajshima (1993-2003). As known for more than a decade, turbo code is the astonishing error control coding scheme which its performance closes to the Shannon's limit. It has been honored consequently as one of the seventeen great innovations during the first fifty years of information theory foundation. With the amazing performance compared to that of other existing codes, turbo codes have been adopted into many communication systems and incorporated with various modern industrial standards. Numerous research works have been reported from universities and advance companies worldwide. Evidently, it has successfully revolutionized the digital communications. Turbo code and its successors have been applied in most communications starting from the ground terrestrial systems of data storage, ADSL modem, and fiber optic communications. Subsequently, it moves up to the air channel applications by employing to wireless communication systems, and then rises up to the space by using in digital video broadcasting and satellite communications. Undoubtedly, with the excellent error correction potential, it has been selected to support data transmission in space exploring system as well.

Since 2004 the Church of the Churchless blog has been inspiring, entertaining, and educating people who view themselves as spiritual but not religious, an ever-expanding group of truth-seekers. The 93 churchless "sermons" in this book have been selected from the early years of the blog, 2004-06. By turns provocative, heartfelt, challenging, humorous, and philosophical, these blog posts reflect the author's struggle to come to grips with the dogmatism he embraced during 35 years of religiosity. While feeling good about becoming more open-minded, his attempts to salvage the positive aspects of spirituality make for

fascinating reading, as do dialogues with visitors to the Church of the Churchless blog.
