The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

2014 marks the 40th anniversary of the publication of Stephen King's first novel *Carrie* in April 1974. Rescued from the rubbish by his wife Tabitha, the novel launched the Maine schoolteacher on a prolific and extraordinarily successful career. His name has become synonymous with horror and suspense through over fifty works, including *The Dark Tower*, a retelling of Byron's Childe Harold to the *Dark Tower* Came. Simpson traces the writer's life from his difficult childhood ? his father went out to the shops and never came back ? through his initial books under the pseudonym Richard Bachman to the success of *Carrie*, *Salem's Lot* and *The Shining* in the 1970s, and beyond. He examines how King's writing was affected by the accident that nearly killed him in 1999 and how his battles with alcohol and addiction to medication have been reflected in his stories. The guide will also take a look at the very many adaptation's of King's work in movies, on television and radio, and in comic books.

The evolution of technology has set the stage for the rapid growth of the video Web: broadband Internet access is ubiquitous, and streaming media protocols, systems, and encoding standards are mature. In addition to Web video delivery, users can easily contribute content captured on low cost camera phones and other consumer products. The media and entertainment industry no longer views these developments as a threat to their established business practices, but as an opportunity to provide services for more viewers in a wider range of consumption contexts. The emergence of IPTV and mobile video services offers unprecedented access to an ever growing number of broadcast channels and provides the flexibility to deliver new, more personalized video services. Highly capable portable media players allow us to take this personalized content with us, and to consume it even in places where the network does not reach. Video search engines enable users to take advantage of these emerging video resources for a wide variety of applications including entertainment, education and communications. However, the task of information extr- tion from video for retrieval applications is challenging, providing opp- tunities for innovation. This book aims to first describe the current state of video search engine technology and second to inform those with the req- site technical skills of the opportunities to contribute to the development of this field. Today's Web search engines have greatly improved the accessibility and therefore the value of the Web.

Be ready the next time the spotlight is on you! She's interviewed "glamazon," watched stars shine (Sharon Stone in a Gap T-shirt at the Oscars) and bomb (Jennifer Aniston in dreadlocks, Cher in an Egyptian headdress), and witnessed many a celebrity rise to the top only to come crashing down a mere year later. As the daughter of Joan Rivers and with years of face time with the Hollywood elite, Melissa has learned far more than your average person about what it takes to be a star—not just on the red carpet, but in life.
