Examines social and cultural phenomena through the lens of different television shows We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it 'good' or 'bad.' Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. *How to Watch Television* brings together forty original essays from today's leading scholars on television culture, writing about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis—suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and transnational circulation are also covered. Addressing television series from the medium's earliest days to contemporary online transformations of television, *How to Watch Television* is designed to engender classroom discussion among television critics of all backgrounds.

Geologists warned it was inevitable that an earthquake would collapse the Three Gorges Dam. When it finally did, a wall of water six hundred feet high rushed down the Yangtze River, destroying other dams as it went. Fifteen million Chinese died in the worst natural disaster in human history. This is what people are told. It is a lie. Kimberly Trayne has no time for the past.

She's a free woman now. There are family reunions to avoid, realm championships to win, and an AI-human hybrid in her life. Or not. It's complicated. What she needs most of all is a vacation. Kim's heard about those; they sound nice. When Mike mentions he has family--of a sort--in China, she even has a destination. What she doesn't know is that behind the Great Firewall of China there are secrets. Secrets about who lives there. Secrets about who dies. Secrets of power and control. Secrets people will kill to keep. Stuff happens, they say. Even after flying halfway around the world, it still keeps happening to her.

In response to a request from the Defense Advanced Research Projects Agency, the committee studied a range of issues to help identify what strategies the Department of Defense might follow to meet its need for flexible, rapidly deployable communications systems. Taking into account the military's particular requirements for security, interoperability, and other capabilities as well as the extent to which commercial technology development can be expected to support these and related needs, the book

recommends systems and component research as well as organizational changes to help the DOD field state-of-the-art, cost-effective untethered communications systems. In addition to advising DARPA on where its investment in information technology for mobile wireless communications systems can have the greatest impact, the book explores the evolution of wireless technology, the often fruitful synergy between commercial and military research and development efforts, and the technical challenges still to be overcome in making the dream of "anytime, anywhere" communications a reality.

It's time to reinvent your sales life...Your sales career is good, but not great. Your customers like you but don't love you. Every potential customer does not want to talk to you (the salesperson), even if they need your product or service. You keep reading the same sales books and listening to the same CD's and podcasts. Everyone is telling you to do the same old things. You're ready to make a change. In his trailblazing and wonderfully refreshing book, Allan Langer takes on the outdated, overused and utterly ineffective sales philosophies of the past and kicks them to the curb. Today's customer's do not want a sales pitch, do not want to be coerced, and absolutely do not want to be "closed." In this book, you will learn: To sell more than you ever have in your career; to sell customers a product or service and actually feel good about yourself doing it; and to never use a "sales pitch" again. The 7 Secrets is your GPS with a new destination, a new route that will take you from where you are now, to a new place on your personal map that will change your life and the life of your loved ones. It will also change the life of your customers, as they will go from hating salespeople, to only wanting to do business with you. Whether you are brand new in the profession, or a seasoned veteran, 7 Secrets will be the best investment you can make in your career, and in yourself.

Television as we knew it is irrevocably changing. Some are gleefully announcing the death of television, others have been less sanguine but insist that television is radically changing underneath our eyes. Several excellent publications have dealt with television's uncertain condition, but few have taken the specific question of what television's transformations mean for the discipline of Television Studies as a starting point. The essays collected in this volume aim to fill this void. Two fundamental questions string the various contributions together. First, is television really in crisis or is the present not so extraordinary when revisiting television's development? Second, should we invent new theoretical concepts or are our old ones still perfectly relevant? To answer such questions the authors in this volume take up diverse case studies, ranging from the academic series Reading Contemporary Television to Flemish Fiction, from nostalgic programming on broadcast television to YouTube, from tell-sell television shows to public television art in the 1980s.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. TiVo Hacks helps you get the most out of your TiVo personal video recorder. Armed with just a screwdriver and basic understanding of PC hardware (or willingness to learn), preeminent hackability awaits. This book includes hacks for changing the order of recorded programs, activating the 30-second skip to blaze through commercials, upgrading TiVo's hard drive for more hours of recording, use of TiVo's Home Media Option to remotely schedule a recording via the Web, log in to the serial port for command-line access to programming data, log files, closed-captioning data, display graphics on the TiVo screen, and even play MP3s.Readers who use advanced hacks to put TiVo on their home network via the serial port, Ethernet, USB, or wireless (with 802.11b WiFi) will watch a whole new world open up. By installing various open source software packages, you can use TiVo for mail, instant messaging, caller-ID, and more. It's also easy to run a web server on TiVo to schedule recordings, access lists of recorded shows, and even display them on a web site. While TiVo gives viewers personalized control of their TVs, TiVo Hacks gives users personalized control of TiVo.Note: Not all TiVos are the same. The original TiVo, the Series 1, is the most hackable TiVo out there; it's a box thrown together with commodity parts and the TiVo code is running on open hardware. The Series 2 TiVo, the most commonly sold TiVo today, is not open. You won't see hacks in this book that involve modifying Series 2 software.

DOD policy requires "[m]embers of the DoD Components comply with the law of war during all armed conflicts, however such conflicts are characterized, and in all other military operations" (Department of Defense Directive [DODD] 2311.01E). This publication addresses topics that are also addressed in the DOD Law of War Manual. In the event of a conflict or discrepancy regarding the legal standards addressed in this publication and the DOD Law of War Manual, the latter takes precedence. In many cases, any apparent conflict or discrepancy may be due to this publication's efforts to provide guidance to Commanders by describing legal concepts more generally rather than exhaustively as found the DOD Law of War Manual. In certain instances, this publication will set out a current policy or practice for Army and Marine forces rather than a legal requirement.
