Step back in time with this memoir as a Rhode Island woman chronicles her childhood spent on a small island in Narragansett Bay in the 1950s. A memoir of reconnecting to long-forgotten childhood bonds and memories, Debbie Kaiman Tillinghast's *The Ferry Home* embraces joyful moments with humor and more troubling emotions with compassion. If you have ever faced emotional challenges within your family or had a sibling relationship with both squabbles and shared mischief, if you have found peace in one memorable place, or if you have ever longed for any of these, then this book is for you. Experience the rhythm of life on Prudence Island, the ebb and flow of changing tides and seasons, and the patterns and relationships that emerge. It is a place where independence is fostered, but friends are always there when needed. As Debbie's vivid accounts unfold, you will feel like you too have just stepped off the ferry and been embraced by the tiny Prudence Island community.

The ways in which Internet traffic is managed have direct consequences on Internet users' rights as well as on their capability to compete on a level playing field. Network neutrality mandates to treat Internet traffic in a non-discriminatory fashion in order to maximise end users' freedom and safeguard an open Internet. This book is the result of a collective work aimed at providing deeper insight into what is network neutrality, how does it relates to human rights and free competition and how to properly frame this key issue through sustainable policies and regulations. The Net Neutrality Compendium stems from three years of discussions nurtured by the members of the Dynamic Coalition on Network Neutrality (DCNN), an open and multi-stakeholder group, established under the aegis of the United Nations Internet Governance Forum (IGF).

Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key Features A go-to guide to help you master AI algorithms and concepts 8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillance Use TensorFlow, Keras, and other Python libraries to implement smart AI applications Book Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow,

Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learn Build an intelligent machine translation system using seq-2-seq neural translation machines Create AI applications using GAN and deploy smart mobile apps using TensorFlow Translate videos into text using CNN and RNN Implement smart AI Chatbots, and integrate and extend them in several domains Create smart reinforcement, learning-based applications using Q-Learning Break and generate CAPTCHA using Deep Learning and Adversarial Learning Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book Gemini Gambit Simon and Schuster

Private investigators Liz Talbot and Nate Andrews are all set to enjoy some quality time on the beach. That's until they get the news about Darius. Darius DeAndre Baker, star of the hit TV show, Main Street USA, has had enough of the Hollywood highlife. After ten years of visiting everyone else's hometown, he returns to his own--Stella Maris, South Carolina. But the moving trucks have barely unloaded when Trina Lynn Causby, Darius's high school girlfriend, turns up dead, and the entire town reels as Darius is arrested. Despite the mounting evidence against him, Liz and Nate believe Darius is innocent. They dig through a scandalously long list of suspects, including Darius's three ex-wives--who have all arrived in Stella Maris--and his love child with Trina Lynn. But Trina Lynn led a complicated life. She had at least one stalker and two suitors--one with a jealous wife who recently made a deliciously outrageous scene when Trina Lynn turned up at a charity ball. As the danger mounts, Liz and Nate race to find a killer and clear Darius's name--and keep him alive. - - - - -
