Case Studies for Corporate Finance: From A (Anheuser) to Z (Zyps) (In 2 Volumes) provides a distinctive collection of 51 real business cases dealing with corporate finance issues over the period of 1985–2014. Written by Harold Bierman Jr, world-renowned author in the field of corporate finance, the book spans over different areas of finance which range from capital structures to leveraged buy-outs to restructuring. While the primary focus of the case studies is the economy of the United States, other parts of the world are also represented. Notable to this comprehensive case studies book are questions to which unique solutions are offered in Volume 2, all of which aim to provide the reader with simulated experience of real business situations involving corporate financial decision-making. Case studies covered include that of Time Warner (1989–1991), The Walt Disney Company (1995), Exxon–Mobil (1998), Mitsubishi's Zero Coupon Convertible Bond (2000), and Apple (2014). Following the highly successful "Digital Photography Manual, the complementary "Photography and Your Digital World concentrates on image-editing and image manipulation, to provide a complete resource aimed at all levels of expertise. Highly practical with a results-oriented approach, the book looks at image creation from both a photographic and artistic viewpoint. The creation of images is examined holistically -- all the components of the process, including the original image, the software tools and the user's skill and creativity are examined and seen to contribute to the end result. Techniques and effects are given in the context of producing exemplary results, and creative solutions are presented for typical imaging problems. Taking a generic approach to software packages wherever possible, the low emphasis on individual software packages will prevent this title from dating quickly, allowing it to retain credibility as new software is developed.
