Object Lessons is a series of short, beautifully designed books about the hidden

lives of ordinary things. While we all use remote controls, we understand little about their history or their impact on our daily lives. Caetlin Benson-Allot looks back on the remote control's material and cultural history to explain how such an innocuous media accessory has changed the way we occupy our houses, interact with our families, and experience the world. From the first wired radio remotes of the 1920s to infrared universal remotes, from the homemade TV controllers to the Apple Remote, remote controls shape our media devices and how we live with them. Object Lessons is published in partnership with an essay series in *The Atlantic*.

subsequent evolution of widescreen technology has allowed directors to push the boundaries of filmmaking. Letterboxed: The Evolution of Widescreen Cinema explores the technological changes of the widescreen technique and how the format has inspired directors and also sparked debates among film critics. Examining early filmmakers such as Buster Keaton and D. W. Griffith and genre pioneers like Nicholas Ray and Douglas Sirk, Harper Cossar explains how directors use wider aspect ratios to enhance their creative visions. Letterboxed tracks the history of stylistic experimentation with the film frame and demonstrates how the expansion of the screen has uncovered myriad creative possibilities for directors.
