The Parisian Diet
Cosimo Reports
Costa Book of the
Year: This novel of
science, magic,

murder, and a determined Victorian-era teenager is a “heady concoction . . . absolutely unforgettable” (Kirkus Reviews, starred review). Faith Sunderly leads a double life. To most people, she is modest and

well mannered—a proper young lady who knows her place. But inside, Faith is burning with questions and curiosity. She keeps sharp watch of her surroundings and, therefore, knows secrets no one suspects her of knowing—like the

real reason her family fled to the close-knit island of Vane. And that her father's death was no accident. In pursuit of revenge and justice for the father she idolizes, Faith hunts through his possessions, where she discovers a strange tree. A tree that bears fruit only when she whispers a lie to it. The fruit, in turn, delivers a hidden truth. The tree might hold the key to her father's murder. Or, it might lure the murderer directly to Faith herself, for lies—like fires, wild and crackling—quickly take on a life of their own. “Frances Hardinge has joined the ranks of those writers of young-adult fiction, like

Philip Pullman, whose approach to fantasy proves so compelling that they quickly develop an adult following, and *The Lie Tree* is a good demonstration of why this is so . . . [a] page-turner.” —Locus “The time is nineteenth-century England just after Darwin's theory of evolution has thrown the scientific world into turmoil; the setting is the fictional island of Vane, between land and sea; the main character is a fourteen-year-old girl caught between society's expectations and her fierce desire to be a scientist. . . . A stunner.” —The Horn Book (starred review) “A murder mystery that dazzles at every

level, shimmering all the more brightly the deeper down into it you go.” —Chicago Tribune “Haunting, and darkly funny . . . features complex, many-sided characters and a clear-eyed examination of the deep sexism of the period, which trapped even the most intelligent women in roles as restrictive as their corsets.” —Publishers Weekly (starred review) “Hardinge, who can turn a phrase like no other, melds a haunting historical mystery with a sharp observation on the dangers of suppressing the thirst for knowledge.” —School Library Journal (starred

"A haunting, disorienting, brilliantly constructed novel, *Djinn* is the story of a young man who joins a clandestine organization under the command of an alluring, androgynous American girl, *Djinn*. Having agreed to wear dark glasses and carry a can like a blind man, he comes to realize, through bizarre encounters, recurring visual images, and fractured time sequences he experiences as part of his undisclosed mission, that he is, in a sense, helplessly blind. His search for the meaning of his mission and for possible clues to the

identity of the mysterious *Djinn*, becomes a quest for his own identity in an ever-shifting time-space continuum. His growing obsession with solving the mystery becomes the reader's own until, through a surprising shift in narrative perspective, the reader too becomes lost in the dimension between past and future." -- Publisher's description

 The Animal That Therefore I Am is the long-awaited translation of the complete text of Jacques Derrida's ten-hour address to the 1997 C erisy conference entitled "The Autobiographical Animal," the third of four such colloquia on his

was assembled posthumously on the basis of two published sections, one written and recorded session, and one informal recorded session. The book is at once an affectionate look back over the multiple roles played by animals in Derrida's work and a profound philosophical investigation and critique of the relegation of animal life that takes place as a result of the distinction--dating from Descartes--between a man as thinking

animal and every other living species. That starts with the very fact of the line of separation drawn between the human and the millions of other species that are reduced to a single "the animal." Derrida finds that distinction, or versions of it, surfacing in thinkers as far apart as Descartes, Kant, Heidegger, Lacan, and Levinas, and he dedicates extended analyses to the question in the work of each of them. The book's autobiographical theme intersects

with its philosophical analysis through the figures of looking and nakedness, staged in terms of Derrida's experience when his cat follows him into the bathroom in the morning. In a classic deconstructive reversal, Derrida asks what this animal sees and thinks when it sees this naked man. Yet the experiences of nakedness and shame also lead all the way back into the mythologies of "man's dominion over the beasts" and trace a history

of how man has systematically displaced onto the animal his own failings or *bêtises*. The Animal That Therefore I Am is at times a militant plea and indictment regarding, especially, the modern industrialized treatment of animals. However, Derrida cannot subscribe to a simplistic version of animal rights that fails to follow through, in all its implications, the questions and definitions of "life" to which he returned in much of his later work.

A career-spanning collection of Marguerite Duras's genre-bending essays that Kirkus

calls "a luminous, erudite exploration of the self and art." In her nonfiction as well as her fiction, Marguerite Duras's curiosity was endless, her intellect voracious. Within a single essay she might roam from Flaubert to the "scattering of desire" to the Holocaust; within the body of her essays overall, style is always evolving, subject matter shifting, as her mind pushes beyond the obvious toward ever-original ground. *Me & Other Writing* is a guidebook to the extraordinary breadth of Duras's nonfiction. From the stunning one-page "Me" to the

sprawling 70-page "Summer 80," there is not a piece in this collection that can be easily categorized. These are essayistic works written for their times but too virtuosic to be relegated to history, works of commentary or recollection or reportage that are also, unmistakably, works of art.

Discovering French, Nouveau! From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the

Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters? The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. The Disappearing Spoon masterfully

fuses science with the classic lore of invention, investigation, and discovery -- from the Big Bang through the end of time. Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.
