If only the answer to every marital question were as easy as “I do!” For many couples the challenges of planning their nuptials are a piece of (wedding) cake compared to what comes after: How do we merge our finances—or do we? Do we need to spend every free minute together? And how do we decide where to spend our first Thanksgiving? Online wedding community The Knot was fielding so many questions like these from their newly married members that they were inspired to create an entirely new site—The Nest—dedicated to the unique issues that face people in the first few years of marriage. A 24/7 virtual married-best-friend-who’s-been-there-before, the site and its thousands of just-married members dish out advice on everything from how to get your permanent roommate to pick up his or her dirty socks, to how to inspect a property when you’re buying your first home, to foolproof guidelines for entertaining the in-laws. Unlike single friends (who don’t have the experience to give tried and true advice) or Mom

(who has lots of experience but tends to give too much advice), Nesties share their experiences with no strings attached—and free of the worries that come with real-world friendship. Now the editors of The Nest have brought together the very best of this hard-won knowledge, plus their own astute insights into the early years of marriage, to create a unique resource for navigating the sometimes bumpy road of marriage. Touching on everything from money to sex and starting a family, they go where no etiquette book or self-help manual has gone before, providing real-life solutions for the myriad problems even the happiest couple can encounter when two become one. Get tips and tricks on: • Merging your money (or not) • Building the family fortune • Loving your in-laws • Buying your first home • Decorating as a duo • Divvying up the chores • Keeping the flame alive • Fighting nicely • Talking about kids • Maintaining your single friends • Hosting during the holidays • Figuring out the future This book is filled with advice, detailed to-dos, checklists, quizzes, and worksheets that are sure to spark conversations, fix problems, and get your new life together on track and off to a good start.

Simple Sequence Books

No Code Required presents the various design, system architectures, research methodologies, and evaluation strategies that are used by end users programming on the Web. It also presents the tools that will allow users to participate in the creation of their own Web. Comprised of seven parts, the book provides basic information about the field of end-user programming. Part 1 points out that the Firefox browser is one of the differentiating factors considered for end-user programming on the Web. Part 2 discusses the automation and customization of the Web. Part 3 covers the different approaches to proposing a specialized platform for creating a new Web browser. Part 4 discusses three systems that focus on the customized tools that will be used by the end users in exploring large amounts of data on the Web. Part 5 explains the role of natural language in the end-user programming systems. Part 6 provides an overview of the assumptions on the accessibility of the Web site

owners of the Web content.

Lastly, Part 7 offers the idea of the Web-active end user, an individual who is seeking new technologies. The first book since Web 2.0 that covers the latest research, development, and systems emerging from HCI research labs on end user programming tools Featuring contributions from the creators of Adobe's Zoetrope and Intel's Mash Maker, discussing test results, implementation, feedback, and ways forward in this booming area
