The identification of English white ironstone plates is made far easier through this new book. Organized according to the shape names, the 327 color photographs and 252 drawings of plates, rims, potters marks and registry marks are easy to compare. Copper Lustre and Tea Leaf decorations are included. Because few written records from the manufacturers are available to help analyze these plates, made in large quantities for export primarily to the United States between about 1840 and 1890, this study will be an important reference for identification and comparisons. It is both comprehensive and easy to use, providing an important tool for collectors, dealers, curators, designers, auctioneers, and historians for analyzing Victorian cultural history.

Pocket Cars(R) are a unique toy in a large world of diecast. They represent a bold move by a Japanese toy producer to capture the American market in the 1970's, just as Honda, Toyota and Datsun were doing at the same time with automobiles. It is partly for that reason that the collector interest in these models is growing rapidly, as the historical significance and quality workmanship of these models is becoming apparent. This book covers all models produced from 1974 to 1979 and includes rarity, desirability, and prices so the collector can understand the market and assemble a collection at a fair price. It also covers all varieties known at this time and shows pictures of every model. I hope you enjoy reading it and use it often while assembling your collection.
