Some advocates and more than a few critics have misconstrued the political economy of media as a unified field of inquiry. The authors from this volume, by contrast, draw from a more diverse stream of the schools of thought signified by this tradition: Neoclassical Economics, Radical Media Political Economy, Schumpeterian Institutional Political Economy, and the Cultural Industries School. The book as a whole is alert to developments in our main objects of analysis - media institutions, technologies, markets, uses and society - as it is to changes in the world around us, including current trends in communication and media studies. The contributors show that digital media are disrupting entire media industries, but without erasing the past. Throughout, the impact of the unprecedented wave of media consolidation in the late-1990s and the financial crisis of the past few years loom large. The authors also suggest that there is no 'supra logic' of 'total system integration' that spans the network media, while insisting that one media sector is not the same as the next. Social networking activities often beg, pilfer and borrow 'content' from 'traditional media', but it remains the case that Time Warner, Comcast, the BBC and News Corp. are very different creatures than Apple, Baidu, Facebook or Google. In other words, even in the age of convergence and remix culture, different media continue to display their own distinctive political economies, as the volume's title - *The Political Economies of Media* - signals.

A critical cultural materialist introduction to the study of global entertainment media. In *Global Entertainment Media*, Tanner Mirrlees undertakes an analysis of the ownership, production, distribution,

marketing, exhibition and consumption of global films and television shows, with an eye to political economy and cultural studies. Among other topics, Mirrlees examines: Paradigms of global entertainment media such as cultural imperialism and cultural globalization. The business of entertainment media: the structure of capitalist culture/creative industries (financers, producers, distributors and exhibitors) and trends in the global political economy of entertainment media. The "governance" of global entertainment media: state and inter-state media and cultural policies and regulations that govern the production, distribution and exhibition of entertainment media and enable or impede its cross-border flow. The new international division of cultural labor (NICL): the cross-border production of entertainment by cultural workers in asymmetrically interdependent media capitals, and economic and cultural concerns surrounding runaway productions and co-productions. The economic motivations and textual design features of globally popular entertainment forms such as blockbuster event films, TV formats, glocalised lifestyle brands and synergistic media. The cross-cultural reception and effects of TV shows and films. The World Wide Web, digitization and convergence culture.

The New York Times Guide to the Best Children's Videos

Unofficial Guides

For over 20 years, the development of children's television programming has been subsidized by toy manufacturers. The result has been an increased commercialisation of children's popular culture - the creation of a "material world" of childhood characterized by brand-name toys, games, clothing, and television characters. Drawing on historical background and case studies, this book presents a unique look at the development of children as targets of the media and commercial industries, and examines the economic and social forces that have defined the evolution of children's entertainment. This volume is of interest to professionals and students in media studies, mass communication, and related fields; readers interested in contemporary children's culture and the content of children's programming.

"The FLOTUS Effect" emphasizes the import of agency on the part of Michelle Obama in relation to her politics as evidenced in her positionality and presence as the first African American woman to serve as First Lady of the United States of America. Her occupation of a previously white space and place tended to frame her as an enigma in the American mind and media. Contributors reflect on Mrs. Obama's eight years in her ceremonial position, and the ways she chose to uniquely embody her role. Hence, the result is a volume that speculates upon her evolving legacy, and the likely "effects" of what it meant to be the first African-American woman to serve in the ceremonial, yet powerful, role of FLOTUS.

What events triggered the worldwide flood in the days of Noah, what has Atlantis or the Nephilim got to do with this and are these things happening again? Ever wondered what happened to the fallen angels mentioned in the bible, their giant offspring who ruled the earth, and what has become of their bloodlines ever since? Do you think they still play a role in world governance? Do you think some of the fallen angel's offspring might still be alive and have survived through the ages? Drawing upon his powers of foreshadowing, prefiguring and prophecy Dr Joseph Opere uncovered the connections between major historical events and our present day reality.
