Along with Confederate flags, the men and women who recently gathered before the Virginia Museum of Fine Arts carried signs proclaiming “Heritage Not Hate.” Theirs, they said, was an “open and visible protest against those who attacked us, our flags, our ancestors, or our Heritage.” How, Nicole Maurantonio wondered, did “not hate” square with a “heritage” grounded in slavery? How do so-called neo-Confederates distance themselves from the

actions and beliefs of white supremacists while clinging to the very symbols and narratives that tether the Confederacy to the history of racism and oppression in America? The answer, Maurantonio discovers, is bound up in the myth of Confederate exceptionalism—a myth whose components, proponents, and meaning this timely and provocative book explores. The narrative of Confederate exceptionalism, in this analysis, updates two uniquely American mythologies—the Lost Cause and American exceptionalism—blending their elements with discourses of racial neoliberalism to create a seeming separation

between the Confederacy and racist systems. Incorporating several methods and drawing from a range of sources—including ethnographic observations, interviews, and archival documents—Maurantonio examines the various people, objects, and rituals that contribute to this cultural balancing act. Her investigation takes in “official” modes of remembering the Confederacy, such as the monuments and building names that drive the discussion today, but it also pays attention to the more mundane and often subtle ways in which the Confederacy is recalled. Linking the different modes of commemoration, her work bridges the distance that believers in Confederate exceptionalism maintain; while situated in history from the Civil War through the civil rights era, the book brings much-needed clarity to the constitution, persistence, and significance of this divisive myth in the context of our time.

Why do policymakers sometimes adopt policies that are not supported by evidence? How can scholars and practitioners encourage policymakers to listen to research? This book explores these questions, presenting a fascinating case study of a policy that did not work, yet spread rapidly to almost every

state in the United States: the policy of correctional boot camps. Examining the claims on which the implementation of the policy were based, including the assertions that such boot camps would reduce reoffending, save public money and ease overcrowding - none of which proved to be universally accurate - The Evidence Enigma also investigates the political, economic, cultural, and other factors which encouraged the spread of this policy. Both qualitative and quantitative methods are used to test hypotheses, as the author draws rich comparisons with other policies, including Drug Abuse Resistance Education (DARE), abstinence-only sex education programs, and the electronic monitoring or tagging of offenders in England and Wales. Presenting important lessons for guarding against the proliferation of policies that don't work in

future, this ground-breaking and accessible book will be of interest to those working in the fields of criminology, sociology and social and public policy.

Urban Ecology is a rapidly growing field of academic and practical significance. Urban ecologists have published several conference proceedings and regularly contribute to the ecological, architectural, planning, and geography literature. However, important papers in the field that set the foundation for the discipline and illustrate modern approaches from a variety of perspectives and regions of the world have not been collected in a single, accessible book. Foundations of Urban Ecology does this by reprinting important European and American publications, filling gaps in the published literature with a few, targeted original works, and translating key works originally published in German. This edited volume will

provide students and professionals to the very best of San Francisco with a rich background in all facets of urban ecology. The editors emphasize the drivers, patterns, processes and effects of human settlement. The papers they synthesize provide readers with a broad understanding of the local and global aspects of settlement through traditional natural and social science lenses. This interdisciplinary vision gives the reader a comprehensive view of the urban ecosystem by introducing drivers, patterns, processes and effects of human settlements and the relationships between humans and other animals, plants, ecosystem processes, and abiotic conditions. The reader learns how human institutions, health, and preferences influence, and are influenced by, the others members of their shared urban ecosystem.

This provocative study explores how media coverage of Emmett Till's murder influences regional reactions and reignited the Civil Rights movement. On August 28, 1955, fourteen-year-old Chicago native

Emmett Till was brutally beaten to death for allegedly flirting with a white woman at a grocery store in Money, Mississippi. Roy Bryant and J. W. Milam were acquitted of Till's murder—then admitted to the crime in an interview with the national media. They were never convicted. Although Till's body was mutilated, his mother ordered that his casket remain open so that the country could observe the results of racially motivated violence in the Deep South. Media attention fanned the flames of regional tension and impelled many individuals—including Rosa Parks—to become vocal activists for racial equality. In this innovative study, Darryl Mace explores media coverage of Till's murder and analyses its influence on the regional and racial

perspectives. He investigates the portrayal of the trial in popular and black newspapers across the South, documents posttrial reactions, and examines Till's memorialization in the press to highlight the media's role in shaping opinions.

Birdville School opened in 1922 on the corner of two dirt roads at the edge of a fallow farm. Over the next 67 school years it witnessed, and influenced, the unfolding story of the town that grew up around it, amid flood, brushfire, blizzard, tornado, and earthquake; poverty and prosperity; war, peace, and cold war; and even the collapse of the earth beneath its foundations. Its auditorium and cafeteria hosted PTA meetings, plays, movies, concerts, basketball tournaments, holiday parties, Girl Scout and Boy Scout meetings, polio vaccination clinics, and war-time rationing registrations and scrap-collection drives. Local sandlot softball, baseball, and football teams competed in the same surrounding fields that swarmed with gleeful children at recess, and that echoed with the roar of low-flying aircrafts snagging mailbags on their tail hooks. Among its staff were thespians, musicians, firemen, outdoorsmen, and athletes, including a singer who performed in the Coolidge White House, a candidate for the state legislature, an army medic, and a ball player who faced off against the Homestead Grays and the Pittsburgh Pirates. By the time classes concluded for the last time in 1989, thousands of children - including the author - had benefitted from the care, instruction, and example of the Birdville School family. This

book is a feeble tribute to those who made us who we are.
