Safety Management Systems in Aviation Routledge  
Fifty years after the founding of NASA, from 28 to 29 October 2008, the NASA History Division convened a conference whose purpose was a scholarly analysis of NASA's first 50 years. Over two days at NASA Headquarters, historians and

---

policy analysts discussed NASA's role in aeronautics, human spaceflight, exploration, space science, life science, and Earth science, as well as crosscutting themes ranging from space access to international relations in space and NASA's interaction with the public. The speakers were asked to keep in mind the following questions: What are the lessons learned from the first 50 years? What is NASA's role in American culture and in the history of exploration and discovery? What if there had never been a NASA? Based on the past, does NASA have a future? The results of those papers, elaborated and fully referenced, are found in this 50th anniversary volume. The reader will find here, instantiated in the complex institution that is NASA, echoes of perennial themes elaborated in an earlier volume, *Critical Issues in the History of Spaceflight*. The conference culminated a year of celebrations, beginning with an October 2007 conference celebrating the 50th anniversary of the Space Age and including a lecture series, future forums, publications, a large presence at the Smithsonian Folklife Festival, and numerous activities at NASA's 10 Centers and venues around the country. It took place as the Apollo 40th anniversaries began, ironically still the most famous of NASA's achievements, even in the era of the Space Shuttle, International Space Station (ISS), and spacecraft like the Mars Exploration Rovers (MERs) and the Hubble Space Telescope. And it took place as NASA found itself at a major crossroads, for the first time in three decades transitioning, under Administrator Michael Griffin, from the Space Shuttle to a new Ares launch vehicle and Orion crew vehicle capable of returning humans to the Moon and proceeding to Mars in a program known as Constellation. The Space Shuttle, NASA's launch system since 1981, was scheduled to wind down in 2010, freeing up funds for the new Ares launch vehicle. But the latter, even if it moved forward at all deliberate speed, would not be ready until 2015, leaving the unsettling possibility that for

---

at least five years the United States would be forced to use the Russian Soyuz launch vehicle and spacecraft as the sole access to the ISS in which the United States was the major partner. The presidential elections a week after the conference presaged an imminent presidential transition, from the Republican administration of George W. Bush to (as it turned out) the Democratic presidency of Barack Obama, with all the uncertainties that such transitions imply for government programs. The uncertainties for NASA were even greater, as Michael Griffin departed with the outgoing administration and as the world found itself in an unprecedented global economic downturn, with the benefits of national space programs questioned more than ever before. There was no doubt that 50 years of the Space Age had altered humanity in numerous ways ranging from applications satellites to philosophical world views. Throughout its 50 years, NASA has been fortunate to have a strong sense of history and a robust, independent, and

objective history program to document its achievements and analyze its activities. Among its flagship publications are Exploring the Unknown: Selected Documents in the History of the U.S. Civil Space Program, of which seven of eight projected volumes were completed at the time of the 50th anniversary. The reader can do no better than to turn to these volumes for an introduction to NASA history as seen through its primary documents. The list of NASA publications at the end of this volume is also a testimony to the tremendous amount of historical research that the NASA History Division has sponsored over the last 50 years, of which this is the latest volume.

Kentucky is most commonly associated with horses, tobacco fields, bourbon, and coal mines. There is much more to the state, though, than stories of feuding families and Colonel Sanders' famous fried chicken. Kentucky has a rich and often compelling history, and James C. Klotter and Freda C. Klotter introduce readers to an exciting story that spans 12,000 years, looking at the lives of Kentuckians from Native Americans to astronauts. The Klotters examine all aspects of the state's history—its geography, government, social life, cultural achievements, education, and economy. A Concise History of Kentucky recounts the

events of the deadly frontier wars of the state's early history, the divisive Civil War, and the shocking assassination of a governor in 1900. The book tells of Kentucky's leaders from Daniel Boone and Henry Clay to Abraham Lincoln, Mary Breckinridge, and Muhammad Ali. The authors also highlight the lives of Kentuckians, both famous and ordinary, to give a voice to history. The Klotters explore Kentuckians' accomplishments in government, medicine, politics, and the arts. They describe the writing and music that flowered across the state, and they profile the individuals who worked to secure equal rights for women and African Americans. The book explains what it was like to work in the coal mines and explains the daily routine on a nineteenth-century

---

farm. The authors bring Kentucky's story to the twenty-first century and talk about the state's modern economy, where auto manufacturing jobs are replacing traditional agricultural work. A collaboration of the state historian and an experienced educator, *A Concise History of Kentucky* is the best single resource for Kentuckians new and old who want to learn more about the past, present, and future of the Bluegrass State.

"This is one of the best texts I have seen in a while...It makes the world of criminology less daunting and more relevant." —Allyson S. Maida, St. John 's University Introduction to Criminology, Tenth Edition, is a comprehensive introduction to the study of

criminology, focusing on the vital core areas of the field—theory, method, and criminal behavior. With more attention to crime typologies than most introductory texts, Hagan and Daigle investigate all forms of criminal activity, such as organized crime, white collar crime, political crime, and environmental crime. The methods of operation, the effects on society and policy decisions, and the connection between theory and criminal behavior are all explained in a clear, accessible manner. Human Reliability Program (US Department of Energy Regulation) (DOE) (2018 Edition)

The Law Library presents the complete text of the Human Reliability Program (US Department of Energy Regulation) (DOE) (2018 Edition). Updated as of May 29, 2018 DOE is amending its regulation concerning the Human Reliability Program (HRP). This regulation provides the policies and procedures to ensure that individuals who occupy positions affording unescorted access to certain nuclear materials, nuclear explosive devices, facilities and programs meet the highest standards of reliability and physical and mental suitability. The revisions include some clarification of the procedures and burden of proof applicable in certification review hearings, the addition and modification of certain definitions, and a clear statement that a security concern can be reviewed pursuant to the HRP regulation in addition to the DOE regulations for determining eligibility for access to classified matter or special nuclear

"Obscured from our view of slaves and masters in America is a critical third party: the state, with its coercive power. This book completes the grim picture of slavery by showing us the origins, the nature, and the extent of slave patrols in Virginia and the Carolinas from the late seventeenth century through the end of the Civil War. Here we see how the patrols, formed by county courts and state militias, were the closest enforcers of codes governing slaves throughout the South. Mining a variety of sources, Sally Hadden presents the views of both patrollers and slaves as she depicts the patrols, composed of "respectable" members of society as well as poor whites, often mounted and armed with

whips and guns, exerting a brutal and archaic brand of racial control inextricably linked to post – Civil War vigilantism and the Ku Klux Klan. City councils also used patrollers before the war, and police forces afterward, to impose their version of race relations across the South, making the entire region, not just plantations, an armed camp where slave workers were controlled through terror and brutality."

"Since Mayor de Blasio launched the Housing New York Plan in 2014, New York City has accelerated the construction and preservation of affordable housing to levels not seen in 30 years. We are on track to secure more affordable housing in the first four years

of the Administration than in any comparable period since 1978. The City has tripled the share of affordable housing for households earning less than \$25,000.

Funding for housing construction and preservation has doubled, as have the number of homes in the City ' s affordable housing lotteries each year. Hundreds of once-vacant lots have affordable homes rising on them today. Reforms to zoning and tax programs are not just incentivizing, but mandating affordable apartments—paid for by the private sector—in new development." --Page 4.
