For centuries Europeans ruled vast portions of the world, as inhabitants of west European countries sailed to distant continents and took possession of territories whose societies and economies they set out to change. How and why did these farflung empires form, persist, and finally fall? David Abernethy addresses these questions in this magisterial survey of the rise and decline of European overseas empires. Abernethy identifies broad patterns across time and space, interweaving them with fascinating details of cross-cultural encounters. He argues that relatively autonomous profit-making, religious, and governmental institutions enabled west European countries to launch triple assaults on other societies. Indigenous people also played a role in their eventual subjugation by inviting Europeans to intervene in their power struggles. Abernethy finds that imperial decline was often the unanticipated result of wars among major powers. Postwar crises over colonies' unmet expectations empowered movements that eventually took territories as diverse as the thirteen British North American colonies, Spain's South American possessions, India, the Dutch East Indies, Vietnam, and the Gold Coast to independence. In advancing a theory of imperialism that includes European and non-European actors, and in analyzing economic, social, and cultural as well as political dimensions of empire, Abernethy helps account for Europe's long occupation of global center stage. He also sheds light on key features of today's postcolonial world and the legacies of empire, concluding with an insightful approach to the moral evaluation of colonialism.

The sixteenth-century changes wrought by expansion of Spanish empire into Peru shaped the ways of being a family in colonial Peru. Even as migration, race mixture, and transculturation took place, family members fulfilled obligations to one another by adapting custom to a changing world. Family began to shift when, from the moment of their arrival in 1532, Spaniards were joined with elite indigenous women in political marriage-like alliances. Almost immediately, a generation of mestizos was born that challenged the hierarchies of colonial society. In response, the Spanish Crown began to promote the marriage of these men and the travel of Spanish women to Peru to promote good customs and even serve as surrogate parents. Other reactions came from wives in Spain who, abandoned by husbands, sought assistance to fulfill family duties. For indigenous families, the pressures of colonialism prompted migration to cities. By mid-century, the increase of Spanish migration to Peru changed the social landscape, but did not halt mixed-race marriages. The book posits that late sixteenth-century cities, specifically Lima and Arequipa, were host to indigenous and Spanish families but also to numerous 'blended' families borne of a process of mestizaje. In its final chapter, the legacies for the next generation reveal how Spanish fathers sometimes challenged law with custom and sentiment to establish inheritance plans for their children. By tracing family obligations connecting Peru and Spain through dowries, bequests, legal powers, and letters, Transatlantic Obligations presents a powerful call to rethink sixteenth-century definitions of family.
