Brain Storm Spectra
In a secret government lab somewhere in Nevada, a young

scientist cowers in darkness—waiting, listening, and calculating his chances of surviving the unspeakable carnage that has left him trapped and alone. Or almost alone. Soon after, a covert military operation “cleanses” all traces of a top-secret project gone horrifically wrong. Three years later, it begins again—when the quiet of a warm autumn night in a sleepy California town is shattered by a streak of light across the sky, the thunder of impact, and the unleashing of something insidious. Spreading, multiplying, and transforming everything in its path, this diabolical intelligence will not be denied until the

townsfolk—and eventually, all living things—are conquered. Until they are all crawling. . . .

Science fiction is the playground of the imagination. If you are interested in science or fascinated with the future then science fiction is where you explore new ideas and let your dreams and nightmares duke it out on the safety of the page or screen. But what if we could use science fiction to do more than that? What if we could use science fiction based on science fact to not only imagine our future but develop new technologies and products? What if we could use stories, movies and comics as a kind of tool to

explore the real world implications and uses of future technologies today? Science Fiction Prototyping is a practical guide to using fiction as a way to imagine our future in a whole new way. Filled with history, real world examples and conversations with experts like best selling science fiction author Cory Doctorow, senior editor at Dark Horse Comics Chris Warner and Hollywood science expert Sidney Perkowitz, Science Fiction Prototyping will give you the tools you need to begin designing the future with science fiction. The future is Brian David Johnson 's business. As a futurist at Intel Corporation, his charter is to develop an actionable vision for computing in 2021. His work is

called “ future casting ” —using ethnographic field studies, technology research, trend data, and even science fiction to create a pragmatic vision of consumers and computing. Johnson has been pioneering development in artificial intelligence, robotics, and reinventing TV. He speaks and writes extensively about future technologies in articles and scientific papers as well as science fiction short stories and novels (Fake Plastic Love and Screen Future: The Future of Entertainment, Computing and the Devices We Love). He has directed two feature films and is an illustrator and commissioned painter. Table of Contents:

The landmark trilogy of cutting-edge science, international politics, and the real-life ramifications of climate change—updated and abridged into a single novel More than a decade ago, bestselling author Kim Stanley Robinson began a groundbreaking series of near-future eco-thrillers—Forty Signs of Rain, Fifty Degrees Below, and Sixty Days and Counting—that grew increasingly urgent and vital as global warming continued unchecked. Now, condensed into one volume and updated with the latest research, this sweeping trilogy gains new life as Green Earth, a chillingly realistic novel that plunges readers into great floods, a modern Ice Age, and the political fight for all our lives. The Arctic ice pack averaged thirty feet thick in midwinter when it was first measured in the 1950s. By the end of the century it was down to fifteen. One August the ice broke. The next year the breakup started in July. The third year it began in May. That was last year. It 's a muggy summer in Washington, D.C., as Senate environmental staffer Charlie Quibler and his scientist wife, Anna, work to call attention to the growing crisis of global warming. But as they

fight to align the extraordinary march of modern technology with the awesome forces of nature, fate puts an unusual twist on their efforts—one that will pit science against politics in the heart of the coming storm. Praise for the Science in the Capital trilogy “ Perhaps it ’ s no coincidence that one of our most visionary hard sci-fi writers is also a profoundly good nature writer—all the better to tell us what it is we have to lose. ” —Los Angeles Times “ An unforgettable demonstration of what can go wrong when an ecological balance is upset. ” —The New York Times Book Review “ Absorbing and convincing. ” —N

Space Opera / Western by the author of The Golden Age trilogy. Random Acts of Senseless Violence Open Road Media It's November 2044, an election year, and the state of the Union is a farce. The government is broke, the cities are privately owned, and the military is shaking down citizens in the streets. Washington has become a circus and no one knows that better than Oscar Valparaiso. A political spin doctor, Oscar has always made things look good. Now he wants to make a difference. But Oscar has a skeleton in his closet. His only ally: Dr. Greta Penninger, a gifted neurologist at the bleeding edge of

the neural revolution. Together they're out to spread a very dangerous idea whose time has come. And so have their enemies: every technofanatic, government goon, and laptop assassin in America. Oscar and Greta might not survive to change the world, but they'll put a new spin on it. Crawlers MIT Press (MA) Alongside William Gibson and Neal Stephenson, Bruce Sterling stands at the forefront of a select group of writers whose pitch-perfect grasp of the cultural and scientific zeitgeist endows their works of speculative near-future fiction with uncanny verisimilitude. To

read a novel by Sterling is to receive a dispatch from a time traveler. Now, with *The Caryatids*, Sterling has written a stunning testament of faith in the power of human intellect, creativity, and spirit to overcome any obstacle – even the obstacles we carry inside ourselves. The world of 2060 is divided into three spheres of influence, each fighting with the others over the resources of fallen nations and an environment degraded almost to the point of no return. There is the Dispensation, centered in Los Angeles, where entertainment and capitalism have fused

with the highest of high-tech. There is the Acquis, a Green-centered collective that uses invasive neurological technology to create a networked utopia. And there is China, the sole surviving nation-state, a dinosaur that has prospered only by pitilessly pruning its own population. Products of this monstrous world, the daughters of a monstrous mother, and – according to some – monsters themselves, are the Caryatids: the four surviving female clones of a mad Balkan genius and wanted war criminal now ensconced, safely beyond extradition, on an

orbiting space station. Radmila is a Dispensation star determined to forget her past by building a glittering, impregnable future. Vera is an Acquis functionary dedicated to reclaiming their home, the Croatian island of Mljet, from catastrophic pollution. Sonja is a medical specialist in China renowned for selflessly risking herself to help others. And Biserka is a one-woman terrorist network. The four “sisters” are united only by their hatred for their “mother” – and for one another. When evidence surfaces of a coming environmental

cataclysm, the Dispensation sends its greatest statesman – or salesman – John Montgomery Montalban, husband of Radmila, and lover of Vera and Sonja, to gather the Caryatids together in an audacious plan to save the world. A Good Old-Fashioned Future Harper Collins “Gleeful, shrewd, speculative, cynical, closely observed . . . The Zenith Angle offers wisdom and solace, thrills and laughter.” —The Washington Post “Compelling and important . . . A darkly comic fable of info-war, the

black budget, über-geek idealism, and the politics of Homeland Insecurity.” —William Gibson, author of Pattern Recognition Pioneering computer wizard Derek “Van” Vandever has been living extra-large as a VP for a booming Internet company. But the September 11 attacks on America change everything. Recruited as the key member of an elite federal computer-security team, Van enters the labyrinthine trenches of the Washington intelligence

community. His special genius is needed to debug the software glitch in America's most crucial KH-13 satellite, capable of detecting terrorist hotbeds worldwide. But the problem is much deeper. Now Van must make the unlikely leap from scientist to spy, team up with a ruthlessly resourceful ex-Special Forces commando, and root out an unknown enemy—one with access to a weapon of untold destructive power.

The Futurists! Utopian pirate-warriors of the tiny Regency of Carnaro, unlikely

scourge of the Adriatic Sea. Mortal enemies of communists, capitalists, and even fascists (to whom they are not entirely unsympathetic). The ambitious Soldier-Citizens of Carnaro are led by a brilliant and passionate coterie of the perhaps insane. Lorenzo Secondari, World War I veteran, engineering genius, and leader of Croatian raiders. Frau Piffer, Syndicalist manufacturer of torpedos at a factory run by and for women. penchant for going undercover as a man—Alma now works for Delphine Beaumont, the seductive mastermind of a West Coast smuggling ring.

When product goes missing at their Washington Territory outpost, Alma is tasked with tracking the thief and recovering the drugs. In disguise as the scrappy dockworker Jack Camp, this should be easy—once she muscles her way into the local organization, wins the trust of the magnetic local boss and his boys,

discovers the turncoat, and keeps them all from uncovering her secrets. All this, while sending coded dispatches to the circling Pinkerton agents to keep them from closing in. Alma 's enjoying her dangerous game of shifting identities and double crosses as she fights for a promotion and an invitation back into Delphine 's bed. But it 's getting harder and harder to keep her cover stories straight and to know whom to trust. One wrong move and she could be unmasked: as a

woman, as a traitor, or as a spy. The fleeting happiness and abiding melancholy of the asymmetry, heightened by the intimately rendered

surroundings, brings out Mr. Ryan 's most sensuous and emotive writing. " – *The Wall Street Journal* From the Booker nominated author of *The Queen of Dirt Island*, Donal Ryan's new novel follows the Gladney family across three generations seeking the true meaning of what it is to find home and love. In 1973, twenty-year-old Moll Gladney takes a morning bus from her rural home in Ireland and disappears. Bewildered and distraught, Paddy and Kit must confront an

unbearable prospect: that they will never see their daughter again. Five years later, Moll returns from London. What - and who - she brings with her will change the course of her family's life forever. Beautiful and devastating, this exploration of loss, alienation and the redemptive power of love reaffirms Donal Ryan as one of the most talented and empathetic writers at work today.
