Propõe diferentes perspectivas relacionadas aos estudos de patrimônio territorial e turismo no Brasil, na Costa Rica e na Itália. Os autores são professores do Instituto de Geografia da UERJ, da Faculdade de Ciências Geográficas da Universidade da Costa Rica e da Universidade Tor Vergata (Roma 2). Apresentada no idioma original dos autores (português, espanhol e italiano), a obra revela os temas de interesse e as abordagens desenvolvidas pelos pesquisadores em seus respectivos países, sob o prisma da geografia do turismo. O livro é fruto das atividades desempenhadas no

contexto dos acordos de cooperação firmados pela UERJ com a Universidade da Costa Rica e com a Universidade Tor Vergata. Além dos aspectos evidenciados, o conteúdo reflete as singularidades do desenvolvimento dos estudos de patrimônio territorial no contexto socioeconômico e cultural de cada país.

La ricerca tra innovazione, creatività e progetto / Research among Innovation, Creativity and Design

Rubbettino Editore

Informed by systems thinking, this book explores new perspectives in which culture and management are harmoniously integrated and cultural heritage is interpreted both as an essential part of the social and economic context and as an expression of community identity. The combination of a multidisciplinary approach,

| | | |
|--|---|---|
| <p>methodological rigor and reference to robust empirical findings in the fertile field of analysis of UNESCO ' s contribution mean that the book can be considered a reference for the management of cultural heritage. It casts new light on the complex relation of culture and management, which has long occupied both scholars and practitioners and should enable the development</p> | <p>of new pathways for value creation. The book is based on research conducted within the framework of the Consorzio Universitario di Economia Industriale e Manageriale (University Consortium for Industrial and Managerial Economics), a network of universities, businesses and public and private institutions that is dedicated to the production and</p> | <p>dissemination of knowledge in the field. This volume will be of interest to all who are involved in the study and management of the cultural heritage. teoria ed evidenza empirica FrancoAngeli 1072.5 <i>Proceedings of 5th INTBAU International Annual Event</i> FrancoAngeli The management of cultural heritage and public real-estate assets is one of the most crucial challenges concerning the sustainable use of these resources,</p> |

involving dynamic methods to stimulate preservation, development, renewal, and transmission to future generations of these essential assets. The contributions presented in this book provide a rich and varied panorama of research experiences and innovative tools, capable of promoting the re-use of cultural heritage in European cities and cultural landscapes, using a circular economy logic as a model of sustainable development. From this point of view, cultural capital becomes the

driver of a regeneration process on the local, urban, and metropolitan scales, in which the transversal interconnections between the production cycles of the adaptive re-use of the available heritage, both in the adaptation and in the management phase, configure a circular process of multidimensional production of value. Therefore, future territorial redevelopment projects can base their idea strength on an open system of appropriately selected social attractors, whose

enhancement and use have the objective of triggering widespread regeneration effects on the whole territory of influence, receiving inducement and resources to progress.

Processes of Emergence of Systems and Systemic Properties

Several international and European institutions have given increasing importance to sustainable approaches to our existing building stock

and the role of built heritage in this process. At the same time, preventive and planned conservation of built heritage has been increasingly recognised by researchers given its cost-effectiveness for owner-managers, effective long-term quality protection and environmental enhancement of structures, as well as its potential of activating heritage in the employment sector and empowering of local communities. 'Innovative Built Heritage Models' collects the lectures presented at the international conference on CHANGES (2017 Thematic Week, Leuven, Belgium, 6-8 February 2017). The aim of the conference was to provide an international overview of the existing strategies, processes and operational case studies that support the implementation of a preventive and planned conservation approach in the built heritage sector. The conference twins with the 'CHANGES' project, supported by the Joint Programming Initiative Heritage Plus programme. This publication meets the increasing demand for shared information to support the transition towards a more sustainable conservation process. The volume consists of three main parts: 'The CHANGES paradigm', 'Preventive and planned conservation' and 'Case studies of Change'. The book reflects on CHANGES in a straightforward manner by providing research and case studies that serve as baseline records, guidance and essential literature for researchers and practitioners involved in the

built heritage sector.

Nell'ultimo ventennio la competitività territoriale ha modificato profondamente gli obbiettivi d'intervento delle amministrazioni pubbliche verso il patrimonio culturale, sempre più spesso considerato uno strumento per il rilancio economico dei territori. Le tecniche d'indagine connesse ai temi della creative city e del cultural planning trovano ampio spazio nell'agenda politica europea e nazionale ove, però, la dimensione

cognitivo-relazionale dell'economia creativa è fatta coincidere con il modello produttivo tutto italiano del distretto culturale evoluto. Il volume si concentra sul distretto culturale evoluto come "rete di relazione" capace di generare ecosistemi supportivi per l'innovazione, proponendo un framework teorico per lo studio dei suoi assetti organizzativi, delle forme d'integrazione tra la filiera culturale e le altre filiere produttive, dei

legami con i cluster
dell'innovazione
tecnologica, del turismo e
dell'agroalimentare.

This book gathers more
than 150 peer-reviewed
papers presented at the 5th
INTBAU International
Annual Event, held in Milan,
Italy, in July 2017. The book
represents an invaluable
and up-to-date international
exchange of research, case
studies and best practice to
confront the challenges of
designing places, building

cultural landscapes and
enabling the development of
communities. The papers
investigate methodologies of
representation,
communication and
valorization of historic urban
landscapes and cultural
heritage, monitoring
conservation management,
cultural issues in heritage
assessment, placemaking
and local identity
enhancement, as well as
reconstruction of settlements
affected by disasters. With
contributions from leading
experts, including university
researchers, professionals

and policy makers, the book
addresses all who seek to
understand and address the
challenges faced in the
protection and enhancement
of the heritage that has been
created.

Arte contemporanea e sviluppo urbano: esperienze torinesi
Altralinea Edizioni
I testi che si vanno a pubblicare oggi nel merito della riflessione sui distretti industriali, presentano un qualcosa di paradossale. Si parla di un qualcosa che con la crisi partita dal 2006-2007 sembra ormai del tutto esaurito – ed in larga parte ciò è avvenuto – ma che deve essere riproposto come tema di riflessione e di nuova progettazione, perché quei distretti hanno lasciato tracce così significative da mettere subito in evidenza le potenzialità innovative che si potevano aprire nel quadro di

una diversa visione dello sviluppo locale.

processi formativi e nuovi modelli di sviluppo per le economie post-industriali

The idea of heritage as a “capital of irreplaceable cultural, social and economic value” was already present in the European Charter of the Architectural Heritage, adopted by the Council of Europe in 1975 (par.3). Today, this discourse is getting increasing attention

on the research agenda.

Some argue that, although heritage is always valued highly, the current interest in the impact of heritage is caused by the democratisation of heritage and the increased importance of heritage in today’s society. Others argue that a universal scarcity of funds for heritage management and conservation is the reason to give it its proper attention. Therefore, the Raymond Lemaire International Centre for Conservation (University of Leuven) considered

“Heritage Counts” a relevant and timely topic for its yearly international conference, the “thematic week”. This edition twins with the “Cultural Heritage Counts for Europe” project, funded by the EU Culture Programme. The opening day of the conference was co-organised by the lead partner of this project, EUROPA NOSTRA, and brought together European policymakers and international researchers involved in cultural heritage. This volume specifically reports on the lectures and

fruitful debates on heritage impact during the 2015 thematic week. It was observed that evolutions in discourse and policy hold a significant prospect, which also entail an increasing demand for shared insights and formation. In response, this publication reflects on heritage impact by providing research, case studies and reflections that can serve as baseline records, guidance - and hopefully inspiration. The findings are subdivided in three main chapters: “Framing the paradigm”, “Impact assessments:

research, methods and practice” and “Linking management, conservation and sustainable development”.
Patrimonio culturale e paesaggio MDPI
The value of heritage for society is increasingly underscored. This goes hand in hand with a growing interest for local communities’ involvement in heritage management plans. Although this shift in discourse is acknowledged, its practical implementation seems often too ambitious and not easy to apply. Therefore, the
Raymond Lemaire

International Centre for Conservation (RLICC, University of Leuven) considered “community participation in valuing and managing heritage” a relevant and timely topic for its annual international conference, the “Thematic Week”. This volume reports on the lectures and fruitful debates dedicated to this theme during the 2014 Thematic Week, which took place January 22nd-24th. The conference entailed an integral and holistic approach towards community participation. Focusing traditionally on the conservation of the historic urban environment and immovable heritage, the

RLICC took the opportunity to involve both the intangible and movable heritage fields which have a more apparent relation with community participation in managing heritage. The contributions by different international authors, including theoretical reflections, policy / discourse analyses and practical case studies, show that a balanced approach is needed. They evidence that more research is required on the success and on failure factors associated with community participation in heritage preservation and management projects. It appears that taking full advantage of public

participation requires considering heritage as an economic, social and intellectual resource for local communities. These added benefits can enhance the value a community attributes to heritage and encourages them to maintain it. This publication was developed in context of the UNESCO Chair on Preventive Conservation, Monitoring and Maintenance of Monuments and Sites (PRECOM3OS), established at the RLICC in collaboration with Monumentenwacht Vlaanderen and the Faculty of Architecture of the University of Cuenca in Ecuador and financially supported by the Janssen

Fund for Preventive
Conservation.

Professionalism entails the
conduct, aims and qualities
that characterise a
profession. The term is also
used to describe education
and training standards for
the knowledge and skills
necessary to perform a
specific profession. In
practice, professional
standards of practice and
ethics are agreed upon and
maintained by recognised
associations. In the past,
professionalism has not

occupied a central place in
built heritage discussions,
policy and research. Recent
changes in terms of public
attitudes and sustainability
concerns have had a
cumulative impact on the
requirements for
professionalism in the built
heritage sector. The future
success of the sector will
depend on the availability of
adequate professionals and
an appropriately skilled
workforce. In practice, the
built heritage sector involves
much more than
interventions to conserve,
preserve, rehabilitate or

restore a heritage structure. Bringing a project to fruition begins with the formulation of a policy, proceeds to the design and execution of intervention strategies and ends with ongoing maintenance of heritage structures and related future programming. This process requires sufficient interactions between different professionals to obtain a common vision and hold that vision throughout a project. At the same time, the sustainability of the sector is also defined by effective governance,

societal support and cultural rationales. Professionalism in the Built Heritage Sector contains reports on the lectures of the international conference organized by the Raymond Lemaire International Centre for Conservation (Leuven, Belgium, February 5th-8th, 2018). The contributions in this volume meet the increasing demand for shared information to support the transition towards a more sustainable conservation process. The volume consists of three main parts that deal with

practice-led research or scientific research: "Profiles and capacities", "Education, training and quality labels", and "Obstacles and changes".
