Cyclists are everywhere, the cautionary bumper stickers tell you. More than ever before, bicycle culture is everywhere, too: from Portland, Oregon, to Portland, Maine, city planners are making big changes to city infrastructure for the increasing numbers of people who are leaving their cars at home (or deep-sixing them altogether) and upgrading to two wheels. Biking in the city is no longer just for bike messengers with a death wish. Biking's benefits are myriad: better fitness, smaller environmental footprint, quiet and low profile, cheaper, greater accessibility. For each new, non-competitive cyclist in the consumer marketplace, there is at least one bicycle that needs to be fixed, maintained, and customized. Cyclists are looking for communities of like-minded people to learn the basics of repair and maintenance, the tricks of the trade, and get some super inspiring ideas for making their bike reflect their lifestyle choices. It is a modern activity, one of the primary ways we consume information and entertainment, something we ' ll do over dinner, at a bar, or even standing on the street peering into a store window—watch TV. Many of us spend countless hours in front of the tube, and even those of us who have proudly eliminated it from our lives can probably still rattle off the names of today ' s most popular shows. But for as crucial as television viewing is in modern culture, the television set itself, as a ubiquitous object in our environment, rarely captures our attention—turn one off and it seems to all but disappear. In this book, Chris Horrocks tells the story of the television set, exploring its contradictory presence in our lives as both a material object and a conveyor of illusory images. Horrocks begins in the nineteenth century and television ' s prehistory as a fantastic, futuristic concept. He follows the television ' s journey from its strange roots in spiritualism, imperialism, and Victorian experiments in electro-magnetism to the contested accounts of its actual invention, looking at the work of engineering pioneers such as Philo Farnsworth and John Logie Baird. Unboxing sets all across the world, he details how it arrived as an essential consumer product and began to play an extraordinary role as a bridge between public and private life. Horrocks describes how the console and cabinet themselves expressed status and good taste and how their designs drew on cultural phenomena such as the space race and the avant-garde. He discusses how we have both loved it for what it can provide and reviled it as a sinister object literally controlling our thoughts, and he shows how it has figured in other cultural realms, such as the work of artists like Wolf Vostell and Nam June Paik. Finally, Horrocks laments the death of the cathode ray tube and the emergence of the flat-screen, which has reduced the presence of the television as a significant material object. Altogether, *The Joy of Sets* brings this most elusive object into crystal-clear critical and historical focus.

The Ultimate D.I.Y Guide for Credit Repair Simon and Schuster Society relies heavily on credit for most financial decisions. Today, good credit is not just important for getting a loan or a credit card. Many businesses have to check your credit before deciding whether or not they will extend their products and services to you. Mortgage lenders need to be sure that you will pay your mortgage responsibly before they can finance you. Without good credit, the mortgage lender concludes that giving you a loan is risky for them. If they still approve, regardless of your poor credit, they will charge you a very high interest rate. Bad credit will see you pay a higher mortgage amount or worse, your mortgage application will be declined. Just because you are not currently interested in buying a house does not mean that your credit does not matter. Landlords will, in most cases, consult your credit before renting you a house or apartment. Your lease is considered a loan. You require a loan to purchase a car

unless you have the full amount at hand. Your credit score affects the loan amount and interest rate and whether or not you will be given the loan in the first place. With excellent credit, you will qualify for a higher loan amount and the interest rate will be lower. A poor credit score translates to limited options. Not many lenders will be ready to finance you and the few that will be willing might charge a very high interest rate. Self-education is reading, writing, thinking and exploring your life for your own motives which could be something like: 1.) A desire to live a fun, great, hedonistic-noble lifestyle. 2.) A driving need to constantly purge your natural energy. 3.) A driving force to change the world in a big way with a big idea. Some self-educated people don't have big ideas and big aspirations but they quietly try to improve the world in their own little ways. It's a fun way to live. Being inspired all the time is the best way to live for the few people who figure out that this is the best life possible. I wrote a book about it called *A Free Spirit's Search For Enlightenment*. Education doesn't end after formal schooling nor is it necessarily concerned with work-related upgrading. People continue to learn for many reasons among them the search for enlightenment, recreation, fun, practical matters and even go to classes to hope to meet a lover.
