# Dna Scissors Activity Answer

Right here, we have countless book Dna Scissors Activity Answer and collections to check out. We additionally manage to pay for variant types and also type of the books to browse. The usual book, fiction, history, novel, scientific research, as competently as various new sorts of books are readily affable here.

As this Dna Scissors Activity Answer, it ends happening inborn one of the favored ebook Dna Scissors Activity Answer collections that we have. This is why you remain in the best website to look the unbelievable book to have.

## Dna Scissors Lab Answers

3. What is the function of these enzymes? DNA scissors (cuts

the DNA molecule in a specific place  
4. What is a restriction site? The site (DNA sequence) recognized by the enzyme where it cuts  
5. What would be the “bottom” of the following

DNA palindrome? 5 ' CAATTG 3 ' 3 ' GTTAAC 5 ' Check for Understanding 2: 6. What is a “sticky end” ?  
Dna Scissors Activity Answer - igt.tilth.org  
They act as DNA scissors, cutting the foreign DNA into pieces so that it

---

cannot function.

Restriction enzymes recognize and cut at specific places along the DNA molecule called restriction sites. Each different restriction enzyme and there are hundreds, made by many different bacterial has its own type of site.

Restriction

Enzymes: DNA  
Scissors. Name

---

---

\_\_\_\_\_.  
Background:

DNA

fingerprinting is  
made possible in  
part by special  
enzymes that cut  
DNA. These  
enzymes are  
called restriction  
enzymes.

Restriction

enzymes are  
proteins that  
bacteria use to

cut up DNA that  
doesn't belong  
to them. If a  
bacterium  
senses that a  
virus is trying to  
invade, or a  
different species  
of bacterium  
represents a  
threat, it can use  
a restriction  
enzyme to cut up  
the foreigner's  
DNA.

ilovebistrot.it Restriction enzymes are proteins produced by bacteria to prevent or restrict invasion by foreign DNA. They act as DNA scissors, cutting the foreign DNA into pieces so that it cannot function. A nuclease is any enzyme that cuts the phosphodiester bonds of the DNA backbone, and an endonuclease is an enzyme that cuts somewhere within a DNA molecule. Dna Scissors
