You probably don ’ t know me, and no, I don ’ t know you, but the purpose of this book is to reveal to you what God can do. It says in Jeremiah 29:11 that God has a plan and purpose for our life, but in order to live that purpose out, we first have to grasp the fact that we ’ re worth the pain, worth the struggle, and worth God ’ s grace. If you don ’ t believe in the value that God has on your life, then you can ’ t live right no matter how hard you try. It hurts me to see how so many Christians in today ’ s time have yet to realize their worth in God. If many of them knew their worth, lifestyles would change. If many of them knew their worth, church walls would be unable to contain the praise. In order to truly be effective in the Kingdom, you have to know who you are. God stands ready, waiting to receive us, but we have to be willing to receive and accept ourselves even with all of our faults. After reading this piece, I pray that you are encouraged to press on in faith with a renewed, bold confidence in God himself. I hope that you enjoy this book as much as I ’ ve enjoyed writing it. God bless!!!!

Dad, How Do I? Penguin

This book defines the concept and practices of literacy through a discussion of knowledge, information media, culture, subjectivity, science, communication, and politics. Examining the ways in which the spread of literacy and education have caused culture wars in pluralist societies since the 16th century, the author reviews an interdisciplinary array of scholarly literature to contend that science, and more broadly evidence-based inductive arguments, offer the only reliable source information, and the only peaceful solution to cultural conflict in the 21st century. With a focus on the multifaceted practice of literacy-as-communication as embedded within larger social and political processes, this book offers a comprehensive study of literacy through five core topics: knowledge, psychology, culture, science, and arguing over truth in pluralist democracies. The central thesis of the book argues that we require a new literacy that incorporates reading and writing with advanced cognitive and epistemological skills. Today ’ s citizens need to be able to understand the basic cognitive and cultural processes through which knowledge is created, and they need to know how to evaluate knowledge, peacefully debate knowledge, and productively use knowledge, for both personal decisions and public policy. How Do You Know? The Epistemological Foundations of 21st Century Literacy is an interdisciplinary study that will appeal to scholars across the sciences and humanities, especially those concerned with pedagogy and the science of learning.

In this book you will read how a successful man, married to a strong and beautiful woman, with a great family, who had an amazing career and lived a life that most people would die for, would come out as transgender at 63 years old. You will enjoy reading a lot of funny and interesting stories in the book. Like when she almost burned the firehouse down that she worked at, or how she snuck into the 1980 Winter Olympic USA-Soviet Union hockey game, or while rescuing someone in a raging fire the woman she was rescuing said to her, "It's about time you fuckers got here." She also recounts how as Chief

Financial Officer of American Ski Company, she helped to take them public on Wall Street.Her memoir will make you think, laugh and maybe even cry. It might also leave you in amazement. You won't be bored while waiting for 66 years of her life to be told because her life hasn't been boring, but rather, very interesting. She would be hard pressed to not find something to write about in a career that included 60 jobs, occupations, businesses owned or management positions. She tells of her life journey and eventually coming out as a trans-woman to friends and family. She speaks to the amazing acceptance she has been fortunate to receive and the hurtful rejection she's experienced. She hopes it will end your curiosity as to what being transgender is all about. This story describes her raw human emotions and what it is like to hide something about yourself from family and friends for 55 years and then finally telling everyone! It has been proven to her thru this journey that people can change and reach self-actualization. Her reality has helped her to develop a personal mission statement, which is: To educate and enlighten people about the trans community by setting a good example and do so, one person at a time. She hopes that after you've read this book you will be able to say, "Cami, you succeeded."

Dr. John Bargh, the world ’ s leading expert on the unconscious mind, presents a “ brilliant and convincing book ” (Malcolm Gladwell) cited as an outstanding read of 2017 by Business Insider and The Financial Times—giving us an entirely new understanding of the hidden mental processes that secretly govern every aspect of our behavior. For more than three decades, Dr. John Bargh has conducted revolutionary research into the unconscious mind, research featured in bestsellers like Blink and Thinking Fast and Slow. Now, in what Dr. John Gottman said was “ the most important and exciting book in psychology that has been written in the past twenty years, ” Dr. Bargh takes us on an entertaining and enlightening tour of the forces that affect everyday behavior while transforming our understanding of ourselves in profound ways. Dr. Bargh takes us into his labs at New York University and Yale—where he and his colleagues have discovered how the unconscious guides our behavior, goals, and motivations in areas like race relations, parenting, business, consumer behavior, and addiction. With infectious enthusiasm he reveals what science now knows about the pervasive influence of the unconscious mind in who we choose to date or vote for, what we buy, where we live, how we perform on tests and in job interviews, and much more. Because the unconscious works in ways we are completely unaware of, Before You Know It is full of surprising and entertaining revelations as well as useful tricks to help you remember items on your to-do list, to shop smarter, and to sleep better. Before You Know It is “ a fascinating compendium of landmark social-psychology research ” (Publishers Weekly) and an introduction to a fabulous world that exists below the surface of your awareness and yet is the key to knowing yourself and unlocking new ways of thinking, feeling, and behaving.

A positive journey of two front-line EVAC nurses returning from Vietnam, the center of madness. They return to reclaim their virtues, dysfunctional families, and delicate microcosms of religious faith. A textured portrait of the imprecise structures they ran away from three years ago, now possessing a graphic glue eclipsing that which they were before. Two feisty, amusing, feminine rebels whose middle age crisis came early, their lassitude poignantly, gradually replaced by a quixotic sense of future. A vigorous, affirmative character analysis of transition of spirit. DO YOU KNOW YOUR LINES?, a metaphor asking, do you know what to say at that moment in our lives when words almost fail; do fail? Why? Because we may be emotionally bankrupt; willpower, alone, no longer able to return us to those graceful, idealistic, delicious times before fatigue and confusion penetrated deeply into our being.

Do You Know Who You Really Are? presents an understanding of our pre-mortal lives, why we are here on earth, and where we are going after mortality. In ten succinct chapters, Fred Kohler Holbrook tackles matters such as the purpose of mortality, the meaning of the human body, and why we are born into a particular race or ethnicity. It is time for us to know who we really are, our intrinsic selves; and the author actively encourages the pursuit of theological answers to deep questions, calling us to know who we really are, and to make our eternal selves who we want to be.

“ Levin ’ s luminous latest reckons with the disorientation of contemporary America. . . . Through the fog of doubt, Levin

summons ferocious intellect and musters hard-won clairvoyance. ” —Publishers Weekly, starred review Dana Levin ’ s fifth collection is a brave and perceptive companion, walking with the reader through the disorientations of personal and collective transformation. Now Do You Know Where You Are investigates how great change calls the soul out of the old lyric, “ to be a messenger to record whatever wanted to stream through. ” Levin works in a variety of forms, calling on beloveds and ancestors, great thinkers and religions convened by Levin ’ s own spun-of-light wisdom and intellectual hospitality balancing clear-eyed forensics of the past with vatic knowledge of the future. “ So many bodies a soul has to press through: personal, familial, regional, national, global, planetary, cosmic // ‘ Now do you know where you are? ’ ” “ Dana Levin is the modern-day master of the em-dash. ” —New York Times Magazine "The book weaves in and out of prose, and it ’ s no wonder that the haibun is the generative form in these pages. A form invented by Basho so that he could move from the prose of his travelogues to the quick intensities of haiku, back and forth. Emily Dickinson does the same thing in her letters. And because this is a poet of the western United States—born outside of Los Angeles and raised in the Mojave, then two decades in Santa Fe, now in middle America, St. Louis—maybe it ’ s right to think of her work in terms of storm clouds: if the prose is an anvil cloud, the flash of poetry at the end is lightning. ” —Jesse Nathan, McSweeney ’ s

Forget the 10,000 hour rule— what if it ’ s possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What ’ s on your list? What ’ s holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don ’ t have and effort you can ’ t spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That ’ s why it ’ s difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It ’ s so much easier to watch TV or surf the web . . . In The First 20 Hours, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you ’ ll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You ’ ll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you ’ re trying to achieve, and what you ’ ll be able to do when you ’ re done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it ’ s easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you ’ re performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, The First 20 Hours will help you pick up the basics of any skill in record time . . . and have more fun along the way.
