The TARDIS lands the Doctor and Martha in the Lake District in 1909, where a small village has been terrorised by a giant, scaly monster. The search is on for the elusive 'Beast of Westmorland', and explorers, naturalists and hunters from across the country are descending on the fells. King Edward VII himself is on his way to join the search, with a knighthood for whoever finds the Beast. But there is

a more sinister presence at work in the Lakes than a mere monster on the rampage, and the Doctor is soon embroiled in the plans of an old and terrifying enemy. And as the hunters become the hunted, a desperate battle of wits begins - with the future of the entire world at stake... #1 NEW YORK TIMES BESTSELLER • PULITZER PRIZE FINALIST • This inspiring, exquisitely observed memoir finds hope and beauty in the face of insurmountable odds as an idealistic young neurosurgeon attempts to answer the question What makes a life worth living? YEAR BY The New York Times Book Review • People • NPR • The Washington Post • Slate • Harper's Bazaar • Time Out New York • Publishers Weekly • BookPage Finalist for the PEN Center USA Literary Award in Creative Nonfiction and the Books for a Better Life Award in Inspirational Memoir At the age of thirty-six, on the verge of completing a decade's worth of training as a neurosurgeon, Paul Kalanithi was diagnosed with stage IV lung cancer. One day he was a doctor treating the dying, and the next he was a patient struggling to live. And just like that, the future he and his wife had imagined evaporated. When Breath Becomes Air chronicles Kalanithi's transformation from a naïve medical student "possessed," as he wrote, "by the question of what, given that all organisms die, makes a virtuous and meaningful life" into a neurosurgeon at Stanford working in the brain, the most critical place for human identity, and finally into a patient and new father confronting his own mortality. What makes life worth living in the face of death? What do you do when the future, no longer a ladder toward your goals in life, flattens out into a perpetual present? What does it mean to have a child, to nurture a new life as another fades away? These are some of the questions Kalanithi wrestles with in this profoundly moving, exquisitely observed memoir. Paul Kalanithi died in March 2015, while working on this book, yet his words live on as a guide and a gift to us all. "I began to realize that coming face to face with my own mortality, in a sense, had changed nothing and everything," he wrote. "Seven

words from Samuel Beckett began to repeat in my head: 'I can't go on. I'll go on.' " When Breath Becomes Air is an unforgettable, life-affirming reflection on the challenge of facing death and on the relationship between doctor and patient, from a brilliant writer who became both.

It is almost

Halloween in the sleepy New England town of Blackwood Falls. Autumn leaves litter lawns and sidewalks, paper skeletons hang in windows, and carved pumpkins leer from stoops and front porches. The Doctor and Martha soon discover that something long-dormant has awoken in the town, and this will be no ordinary Halloween. What is the secret of the ancient chestnut tree and the mysterious book discovered tangled in its roots? What rises from the local churchyard in the dead of night, sealing up the lips of the only witness? And why are the harmless trappings of Halloween suddenly taking on a creepy new life of their own? As nightmarish creatures prowl the streets, the Doctor and Martha must battle to prevent both the townspeople and themselves from suffering a grisly

fate... Featuring the Tenth Doctor and Martha as played by David Tennant and Freema Agyeman in the hit sci-fi series from BBC Television. This Is Going to Hurt University-Press.org Affected by a strange force, the TARDIS is dragged down to the desolate planet of Vortis. Until they can discover what is holding them there, the Doctor and his friends are trapped on the planet... The Doctor, Ian and Vicki are captured by the Zarbi - huge ant-like creatures controlled by the parasitic alien Animus. Meanwhile, Barbara runs into a group of Menoptra, butterfly-like creatures that have been driven from their home planet by the Animus, and plan to return with an invasion force. But the Zarbi know their plans and are waiting for the Menoptra... This

novel is based on a Doctor Who story which was originally broadcast from 13 February-20 March 1965. Featuring the First Doctor as played by William Hartnell with his companions Barbara, Ian, and Vicki Random House Set during the French and American wars, Fourth Uncle in the Mountain is a true story about an orphan, Quang Van Nguyen, who is adopted by a sixty-four year old monk, Thau, who carries great responsibility for his people as a barefoot doctor. Thau manages, against all odds to raise his son to follow in his footsteps and in doing so, saves his son, as well as a part of Vietnam's esoteric knowledge from the Vietnam holocaust. Thau is wanted by the French regime, and occasionally must flee into the

jungle, where he is perfectly at home living among the animals. Thau is not the average monk; he practices an ancient lineage of Chinese medicine and uses magic to protect animals and help people. As wise and resourceful as Thau is, he meets his match in his mischievous son. Quang is more interested in learning Cambodian sorcery and martial arts than in developing his skills and wisdom according to his father's plan. Fourth Uncle in the Mountain is an odyssey of a single-father folk hero and his foundling son in a land ravaged by the atrocities of war. It is a classic story, complete with humor, tragedy, and insight from a country where ghosts and magic are real. *Doctor Who: The Missy*

James Lane Allen
(1849–1925) was an
American novelist

and short story writer whose work, including the novel *A Kentucky Cardinal*, often depicted the culture and dialects of his native Kentucky. His work is characteristic of the late-19th century local color era, when writers sought to capture the vernacular in their fiction. Allen has been described as "Kentucky's first important novelist." *The Doctor's Not-So-Little Secret* Random House ALL-NEW ADVENTURES WITH THE ELEVENTH DOCTOR! Doctor Who: The Eleventh Doctor #9

Random House
Oxford, 1278 -- the Doctor is keen to put a stop to the pioneering scientific experiments of Roger Bacon. Bacon has developed ideas for submarines, explosives, telescopes and aeroplanes -- history will be cast into chaos if any of these ideas see the light of day. Bacon is living among Franciscan friars who consider him to be a heretic embarrassment. When a friar is found dead in suspicious circumstances, they are keen to implicate Bacon and have him locked away for good. However, more and more murders are being committed and it's increasingly obvious that Bacon cannot be held responsible for them all.
