requirements.

### **Document Control Register**

A risk register, also called a register log is created on the early stages of a project. It is an important document in your risk management plan; it enables you to identify potential risks in a project or an organization and at the same time, it helps you record and track issues and address problems as they arise.

Document Control Register Examples

*How to implement Document Management System in SharePoint ...*

Controlling documents is a key requirement of ISO 9001:2008 (Control of Documents' (4.2.3)), and one of the required six documented procedures is the Document Control Procedure (4.2.3). The standard specifies that 7 controls should be defined within the procedure; these are further explained in Table A.
