Merely said, the Document Id Sharepoint 2013 is universally compatible gone any devices to read.

Document ID Service in SharePoint
2013 - C# Corner

October, 14 2024

From the MSDN article: <http://msdn.microsoft.com/en-us/library/ee559302.aspx>, specifically the section on " Document ID lookup behaviour ", we are informed that SharePoint takes a two-part approach to locating the document via the Document ID, first trying search, which if the document has been indexed correctly, will return a single result and will cause a redirect to the document itself via the link provided by search. If search returns no results (e.g. the document has just been added ...

Activate and configure Document IDs in a site collection ...

At the beginning, the

Document ID of documents was like this: "custom prefix" + 3 digit number (document library id) + sequential number I.E. "myprefix-104-10" After few projects (may be 50), the "document library id" has changed from 3 digit to 10. So the Document ID is like this:

"myprefix-1038123417-16" Now there are 115 projects in total.

Enable and configure unique Document IDs - SharePoint This post introduces you to a correct way to set up

Document ID Prefix in SharePoint 2013.

Immediately after you kick off the timer jobs for Document ID service in this approach, all of your documents under the new site will show up with correct prefix. We have recently rolled out a web template based on our team site template.

Set Document ID Prefix programmatically in SharePoint 2013

Document ID is a feature available at a site collection level in SharePoint that

assigns each document uploaded to SharePoint a unique ID. This ID allows us to quickly find a document within SharePoint by this uniquely assigned number. Moreover, the documents also get a permanent URL (via the same unique Document ID assigned to it).

Once the Document ID Service is enabled, every new or edited document instantly gets a Document ID assigned. However, historical documents do not get an immediate Document ID assignment. The assignment of Document IDs to documents that were uploaded prior to this service being enabled are assigned by a Timer Job called the “Document ID assignment job” that exists at the Web Application level.

Configure unique document ids for SharePoint 2013 document

...

Microsoft introduced the Document-ID service in SharePoint 2010 and of course the Document-ID service is also available in SharePoint 2013. To use the standard Document-ID provider that ships with SharePoint you simply need to activate the

following site collection feature:feature enabled.

Because the Document-ID service is activated as a site collection feature you can be sure that the created Document-IDs are unique within the current site collection.

Document ID feature only makes sense if you use Document ID for the sake of assigning a unique ID to each document in your tenant. With modern SharePoint sites, if you move the document between document libraries on the same SharePoint site – the link is kept anyway and is not broken even without a Document ID
