Routledge International Handbook of Schools and Schooling in Asia
Greenwood Publishing Group

For the past three decades, policies regarding a variety of information issues have emanated from federal agencies, legislative chambers, and corporate boardrooms. Despite the focus on information policy, it is still a relatively new concept and one only now beginning to be studied. The subject area is wider than believed--archives and records policies, information resources management, information technology, telecommunications, international communications, privacy and confidentiality, computer regulation and crime, intellectual property, and information systems and dissemination. This is not a compendium of policies to be used, but rather an exploration in a more detailed fashion of the fundamental principles supporting the setting of records policies. Records policies are critically important for records professionals to develop and use as a means of strategically managing the information and evidence found in the millions of records created daily, provided that the policies are based on comprehensible principles. This is a series of discourses on the fundamentals of archives and records management needing to be understood before any organization attempts to define and set any policy affecting records and information. The chapters concern defining records, how information technology plays into policy compiling, the fundamental tasks of identifying and maintaining records as critical to records and information policy, public outreach and advocacy as a key objective for such policy, and the role of educating records professionals in supporting sensible records policies.

Optimizing Digital Solutions for Hyper-Personalization in Tourism and Hospitality Routledge

As hyper-personalization has yet to be perfected, developing hyper-personalized strategies presents a critical challenge; due to this, optimizing hyper-personalization and designing new processes and

business models takes center stage in tourism and hospitality to reach new levels of customer service and experience through the introduction and development of new solutions supported in the internet of things, software interfaces, artificial intelligence solutions, back-end and front-end management tools, and other emergent business intelligence strategies. *Optimizing Digital Solutions for Hyper-Personalization in Tourism and Hospitality* serves as an essential reference source that emphasizes the importance of hyper-personalization models, processes, strategies, and issues within tourism and hospitality fields with a particular focus on digital IT solutions. More than a simple starting point for a critical reflection on the state of the art of this sector, this book aims to contribute in an objective way to leveraging digital solutions to optimize the concept of hyper-personalization in the tourist experience. The content of this book covers research topics that include digital tourism and hospitality, consumer behavior, customer journey, and smart technologies and is ideal for professionals, executives, hotel managers, event coordinators, restaurateurs, travel agents, tour directors, policymakers, government officials, industry professionals, researchers, students, and academicians in the fields of tourism and hospitality management, marketing, and communications.

Billions of minutes a month are spent

globally on social media. This raises not only serious legal issues, but also has a clear impact on everyday commercial activity. This book considers the significant legal developments that have arisen due to social media. It provides an expert explanation of the issues that practitioners and businesses need to consider, as well as the special measures that are required in order to minimize their exposure to risk. The content is highly practical, and not only explores the law related to social media, but also includes useful aids for the reader, such as flow charts, checklists and case studies. Various categories and channels of social media are covered in this book, alongside the legal classification of different social networks. Social media is also considered in the context of human rights law by evaluating the implications this has had upon the development of civil and criminal law when pursuing a civil remedy or criminal prosecution in relation to online speech. As part of these discussions the book deals specifically with the Defamation Act 2013, the Communications Act 2003, the Computer Misuse Act 1990 and the Contempt of Court Act 1988 among other key issues such as seeking Injunctions and the resulting privacy implications. Finally, the author also pays careful consideration to the commercial aspects raised by social media.

The reader will find reference to key cases and regulatory guidance notes and statutes including, the Data Protection Act 1998 (including the draft Data Protection Regulation), user privacy, human rights, trading and advertising standards, special rules for FCA regulated bodies and social media insurance. This book is an invaluable guide for private practice and in-house practitioners, business professionals, academics and post-graduate students involved in the law surrounding social media.

Information security is everyone's concern. The way we live is underwritten by information system infrastructures, most notably the Internet. The functioning of our business organizations, the management of our supply chains, and the operation of our governments depend on the secure flow of information. In an organizational environment information security is a never-ending process of protecting information and the systems that produce it. This volume in the "Advances in Management Information Systems" series covers the managerial landscape of information security. It deals with how organizations and nations organize their information security policies and efforts. The book covers how to strategize and implement security with a special focus on emerging technologies. It highlights the wealth of security technologies, and also indicates that the problem is not a lack of technology but rather its intelligent application.
