Medical Errors in Nursing: Preventing Documentation Errors. The importance of proper documentation in nursing cannot be overstated. Failure to document a patient's condition, medications administered, or anything else related to patient care can result in poor outcomes for patients, and liability issues for the facility, the physician in charge, and the nurse(s).

**Prevent Documentation Errors in Nursing | Medcomrn.com**

FOCUS. Targeted design for the proficient, ethical nurse. Not designed to be everything to everyone. The new documentation is being designed for use by proficient, ethical nurses so we will be challenging old thinking that often resulted in added documentation to address performance issues of very small numbers of low performers.

PowerPoint Presentation

Records are being kept on students who are well (screening, immunization, and episodic health room care); and students with chronic health conditions (emergency care planning; daily treatment and response data for students with conditions such as asthma; severe allergies; seizure disorders; and Type I Diabetes).

In conclusion, documentation in Nursing  
Practice is anything written or  
electronically generated that describes  
the status of client on the care or services  
given to that client. The purpose of  
documentation in nursing practice is to  
facilitate communication, to promote good  
nursing care and to meet professional

legal standards.

The information in this PowerPoint is based on: (1) The triennial reviews of the 18 Short-Doyle/Medi-Cal acute psychiatric inpatient hospitals; and (2) The adjudication of second level Treatment Authorization Request (TAR) appeals. Between these two areas, we review documentation for approximately 4,500 inpatient hospital days per year.
