Get doctors to detail homebound status on face-to-face ...

Documentation of Homebound Status Homebound status must be documented in the clinical records.

[Homebound Status | HomeHealth101.com | Kathy Quan RN BSN](#)

Homebound status is not always permanent. A patient recovering from surgery, an accident, or episode of acute illness can be homebound for a short term. However, once that status changes, the

patient must be discharged for outpatient care or follow up. By the same token, homebound status cannot change on a day-to-day basis to meet with the convenience of homecare. Staying home from outpatient therapy for a few days because of flu or a cold does not a homebound status make.

## Examples Of Homebound Status Documentation

Reading carefully, skillful documentation of homebound status is generally speaking much longer than a simple statement. While the statements in the ' bad ' column may actually state the homebound reason, they do not offer enough information for a third party reviewer to make an independent determination of homebound status.

## **Documentation Of Homebound Status**

The homebound status

fulfills one aspect of qualification for homecare. The documentation of the physical assessment and skilled need serves to illustrate the validity of this status. For example, "upon initial examination, the patient was severely SOB from the 3 minutes it took to ambulate to the front door from the bedroom... a distance of 35 feet."

## **Documentation Of Homebound Status**

Documentation of  
Homebound Status.

Documentation from the  
certifying physician's  
medical records and/or the  
acute/post-acute care  
facility's medical records is  
used to support the  
certification of home health  
eligibility. This  
documentation must support  
the patient's need for skilled  
services and homebound  
status.

### Determining Homebound

Patient is homebound due to  
inability to ambulate for more  
than a few minutes or a few feet  
without falling due to poor  
balance and extreme  
fatigue/weakness; very SOB with  
minimal exertion and patient  
must stop to sit and rest every few  
minutes or he/she cannot go on.  
Patient has had multiple falls with  
injury in recent past and also  
requires
