An on-the-go reference for hospice nurses and those interested in end-of-life care, this practical guide covers the essential elements in the compassionate and holistic care of terminally ill patients and their families. Nurses care for patients facing end-of-life issues in every practice specialty and, as the U.S. population continues to age, the need for proficiency in end-of-life skills will become increasingly important. *Fast Facts for the Hospice Nurse: A Concise Guide to End-of-Life Care* is an invaluable resource that provides emotional, administrative, and palliative support,

whether in a hospice, long-term care facility, or acute care setting. This vital go-to text clearly and concisely lays out not only how to care for patients facing end-of-life issues, but also how to engage in self-care and cope with occupational stress. Beginning with an overview of hospice care, including its history and philosophy, this book offers a timeline of the growth of the hospice movement in the United States. Subsequent sections include up-to-date information on the clinical responsibilities of the hospice nurse in addressing the physical, psychological, and spiritual needs of terminally ill patients and their families in a culturally sensitive way. This book also outlines the administrative duties of the hospice nurse, including hospice documentation, a review of hospice regulations, and quality management. The closing section focuses on occupational stress in hospice nursing and how to engage in self-care. This text can serve as a useful clinical resource and also as a reference for nurses seeking hospice certification from the Hospice and Palliative Credentialing Center. Key Features

A compassionate introduction to the growing health-care option of hospice care for terminally ill patients offers moving real-life stories as well as practical information about the medical and emotional needs of patients and caregivers. Original. 20,000 first printing. The Hospice Choice Springer Publishing Company

When the end of life makes its inevitable appearance, people should be able to expect reliable, humane, and effective caregiving. Yet too many dying people suffer unnecessarily. While an "overtreated" dying is feared, untreated pain or emotional abandonment are equally frightening. *Approaching Death* reflects a wide-ranging effort to understand what we know about care at the end of life, what we have yet to learn, and what we know but do not adequately apply. It seeks to build

understanding of what constitutes good care for the dying and offers recommendations to decisionmakers that address specific barriers to achieving good care. This volume offers a profile of when, where, and how Americans die. It examines the dimensions of caring at the end of life: Determining diagnosis and prognosis and communicating these to patient and family. Establishing clinical and personal goals. Matching physical, psychological, spiritual, and practical care strategies to the patient's values and circumstances.

*Approaching Death* considers the dying experience in hospitals, nursing homes, and other settings and the role of interdisciplinary teams and managed care. It offers perspectives on quality measurement and improvement, the role of practice guidelines, cost concerns, and legal issues such as assisted suicide. The book proposes how health professionals can become better prepared to care well for those who are dying and to understand that these are not patients for whom "nothing can be done."

Meeting the Needs of Older Adults with Serious

Illness: Challenges and Opportunities in the Age of

Health Care Reform provides an introduction to

the principles of palliative care; describes current

models of delivering palliative care across care

settings, and examines opportunities in the setting of healthcare policy reform for palliative care to

improve outcomes for patients, families and healthcare institutions. The United States is currently facing a crisis in health care marked by unsustainable spending and quality that is poor relative to international benchmarks. Yet this is also a critical time of opportunity. Because of its focus on quality of care, the Affordable Care Act is poised to expand access to palliative care services for the sickest, most vulnerable, and therefore most costly, 5% of patients- a small group who nonetheless drive about 50% of all healthcare spending. Palliative care is specialized medical care for people with serious illnesses. It focuses on providing patients with relief from the symptoms, pain, and stress of a serious illness—whatever the diagnosis or stage of illness. The goal is to improve quality of life for both the patient and the family. Research has demonstrated palliative care 's positive impact on health care value. Patients (and family caregivers) receiving palliative care experience improved quality of life, better symptom management, lower rates of depression and anxiety, and improved survival. Because patient and family needs are met, crises are prevented, thereby directly reducing need for emergency department and hospital use and their associated costs. An epiphenomenon of better quality of care, the lower costs associated with palliative care have been observed in multiple studies. Meeting the Needs of Older Adults with Serious Illness: Challenges and Opportunities in the Age of Health Care Reform, a roadmap for effective policy and program design, brings together expert clinicians,

researchers and policy leaders, who tackle key areas where real-world policy options to improve access to quality palliative care could have a substantial role in improving value.

'Foundations of Care' describes core issues, the foundations on which paediatric palliative care is based. 'Child and Family Care' looks at different aspects of psychological, social, and cultural care for the sick child or young person, and their family. These chapters cover the time course of the illness, around the time of death and support for the bereaved family. 'Symptom Care' focuses on the uses of medication, specific symptoms, and their management. Finally, 'Delivery of Care' examines practical approaches to care in different environments and the needs of clinicians. Two new editors join the team from Canada and South Africa, reflecting our aims to contribute towards the development of care for children across the world, and to be a resource for both experienced clinicians and those new to the field. Comprehensive in scope, exhaustive in detail, and definitive in authority, this third edition has been thoroughly updated to cover new practices, current epidemiological data, and the evolving models that support the delivery of palliative medicine to children. This includes two new chapters, looking in detail at 'Decision Making' and 'Perinatal Care', and a new section highlighting the emerging importance of 'Palliative Care for Children in Humanitarian Crises'. This book is an essential resource for anyone who works with children

worldwide.

This comprehensive book thoroughly addresses all aspects of health care transition of adolescents and young adults with chronic illness or disability; and includes the framework, tools and case-based examples needed to develop and evaluate a Health Care Transition (HCT) planning program that can be implemented regardless of a patient's disease or disability. *Health Care Transition: Building a Program for Adolescents and Young Adults with Chronic Illness and Disability* is a uniquely inclusive resource, incorporating youth/young adult, caregiver, and pediatric and adult provider voices and perspectives. Part I of the book opens by defining Health Care Transition, describing the urgent need for comprehensive transition planning, barriers to HCT and then offering a framework for developing and evaluating health care transition programs. Part II focuses on the anatomic and neuro-chemical changes that occur in the brain during adolescence and young adulthood, and how they affect function and behavior. Part III covers the perspectives of important participants in the HCT transition process – youth and young adults, caregivers, and both pediatric and adult providers. Each chapter in Part IV addresses a unique aspect of developing HCT programs. Part V explores various examples of successful transition from the perspective of five key participants in the transition process - patients,

caregivers, pediatric providers, adult providers and third party payers. Related financial matters are covered in part VI, while Part VII explores special issues such as HCT and the medical home, international perspectives, and potential legal issues. Models of HCT programs are presented in Part VIII, utilizing an example case study. Representing perspectives from over 75 authors and more than 100 medical centers in North America and Europe, *Health Care Transition: Building a Program for Adolescents and Young Adults with Chronic Illness and Disability* is an ideal resource for any clinician, policy maker, caregiver, or hospitalist working with youth in transition.
