Decline in Karnofsky

Performance Status (KPS) or Palliative Performance Score (PPS) from <70% due to progression of disease. Increasing emergency room visits, hospitalizations, or physician's visits related to hospice primary diagnosis; Progressive decline in Functional Assessment Staging (FAST) for dementia (from 7A on the FAST)

What you will learn - Hospice Fundamentals indicator of decline. When a nurse is admitt#ing any hospice patient, it is also good to document what the patient was doing 3 and 6 months ago as compared to what the patient is able to do now. This assists in proving decline of the patients status.

Documentation Guide - Alzheimer's Association

The patient ' s diagnosis is known to you, so look for decline and document it. Often the tendency is

---

to try to highlight the positives, but in hospice it ' s best to highlight the negatives. Your documentation makes a difference and can help keep a patient on service.

Documentation Tips and Strategies 2

Document Evidence of Decline for Related Diagnoses:

Documentation must communicate evidence of decline by focusing on problems the patient/caregiver is having. Assess all body systems and treat the patient holistically

3Principles of Proper IDT Documentation - c.ymcdn.com

In hospice you NEVER

say the patient is improving (but you can say "patient states i'm having a good day.") In the hospital setting, negative charting meant that in your narrative, you would only document a deviation from normal. I would think as a new grad, especially a new grad to hospice-you will go through an extensive orientation.

Results. Of 8,669 decedents, there was an average 13.8-point decline in PPS scores. After adjusting for baseline PPS scores and length of stay in hospice, three distinct trajectories were identified, each of which was composed of two diagnoses whose rates of decline had 95% confidence intervals that overlapped.
